How to make a bracelet from pearls?

In this new pattern from our partner Les Perles par Puca®, discover how to combine Samos® and Arcos® pearls to create a beautiful pearl bracelet. This bracelet has been designed to suit all occasions. Whether you're looking to add a touch of elegance to your evening wear or a touch of casual style to your everyday look, this bracelet will be your perfect ally. And to complete your look, Puca® has designed a matching pair of earrings: Schéma B0 Turtle. Puca offers this scheme in a green version, but multiple versions are possible: a monochrome version with a perfect match between par Puca beads and seed beads, a two-tone version with one color for par Puca beads and one color for seed beads, or a multicolor version using different colors for each par Puca bead and seed bead. We've got plenty of colors of Samos and Arcos beads on the site. Take a look at our new colors: Milky and Metalust.

If you'd like to see more Puca® bracelet tutorials, we've got several on the site!
