

RESIN AND DRIED FLOWER LINK EARRINGS

By : Tiffanie Perles&Co

1h

How to make resin links?

Want to get started with resin to create trendy DIY creations? This tutorial is for you! Discover how to make a pair of earrings using a mix of materials: resin and acrylic. With detailed explanations, you'll learn how to use Padico Star Drop UV Led resin to create oval links. Add dried flowers for a springtime touch and leave to dry. Once dry, simply clip them into the acrylic links and add the ear stud. Your pair of earrings is now complete.

If you're a beginner and haven't yet mastered this technique, we've put together a number of [data sheets](#) to help you learn more about resin. And if you'd like to try your hand at other projects, we have several [resin tutorials](#) on the site. And for the more expert among you, you can even learn how to mix techniques, as in the [polymer and resin earrings](#) tutorial.

Warning: UV LED resin also hardens under sunlight. To prevent your resin from hardening while you're spreading it in the mold, make your jewelry in the shade. Wear gloves and ventilate the room.

NB: This tutorial was produced by Tiffanie for [Atelier Déco & Créations n°60 magazine](#). Inside the magazine, you'll find other creative ideas for all occasions.

Which material to use for Resin and dried flower link earrings?

SUPPLIES

27X16mm Oval Acrylic Links - Opaque Mat Coral x10
Ref. : ACR-474
Quantity : 1

12x16cm Silicone mould n°7 to make resin earrings x1
Ref. : ATT-053
Quantity : 1

Boxed assortment of 40 dried and pressed flowers and leaves - Multicolored x1
Ref. : DEK-167
Quantity : 1

Ref. : EAR-849
Quantity : 1

UV-LED Resin Hard Padico - Star Drop x30g
Ref. : OTL-348
Quantity : 1

SUPPLIES

Mini UV LED lamp for DIY creation with UV LED resin x1
Ref. : TECH-118
Quantity : 1

steps

★ Step 1/4

Apply a thin, even first layer of resin. You can spread the resin with a toothpick. Run the mold under the UV LED lamp for 2 minutes.

★ Step 2/4

Place your flowers and make a second thin layer of resin. Flatten the flowers against the first layer. Place under the lamp for 2 minutes.

★ Step 3/4

Apply a final coat to completely cover the flowers and create a smooth surface. Run under the lamp again for 2 minutes. Unmold, turn the pendant upside down and run it under the lamp again for 1 minute to solidify the resin under the flowers. Make the second pendant.

★ Step 4/4

Slide the earring into the peach-colored link. A little force is required. Then attach the resin pendant. Your earrings are finished!
