BRACELET IN MICRO-MACRAMÉ AND GEMSTONES

By : Delphiny

Intermediate

3h

How to integrate gemstones into a micro-macramé bracelet?

Our creative partner Delphiny offers you a tutorial on how to make a bracelet from micro-macramé and gemstones. Thanks to Delphine's detailed steps, you'll learn how to make knots using 0.35 mm Linhasita wire and gemstone beads. To create this bracelet, you'll need to know two types of macramé knot: the double diagonal, left and right half-key knot, and thealternating half-key knot . If you're a beginner, don't worry: the steps are very precise and illustrated with photos, so you'll be able to follow the tutorial without worry. Note that steps 1 to 5 teach you how to make the knots that will make up the bracelet. For the more experienced among you, I'd advise you to go straight to step 6.

To make this bracelet, Delphine chose Cadmium Red for the Linhasita wire and a light pink quartz gemstone for the flattened faceted beads. But this bracelet can be made in a multitude of wire and bead colors. You can find some suggestions at the bottom of the page in the list of material variations. Alternatively, you can find all our Linhasita 0.35mm wires and all our pierced gemstone beads on the site.

For the model shown in this tutorial, you will need:

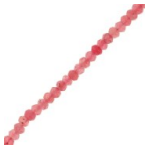
- 8 Linhasita 0.35 mm wires of 145 cm
- Approximately 15 to 17 gemstone beads, depending on the size of the bracelet to be made.

If you're a fan of this technique, take a look at our other micro-macramé tutorials for even more inspiration. And if you reproduce this tutorial at home, don't hesitate to share your creation with us on social networks by mentioning @perlesandco and @delphiny or with #perlesandco. We love to see your beautiful creations!

Which material to use for Bracelet in micro-macramé and gemstones?

SUPPLIES

0,35mm Linhasita waxed thread spool for micro macramé - Cadmium Red (677)x448 m
Ref. : FIO-315
Quantity : 1



4.5x3mm Round flattened faceted beads - dyed gemstone - Light Pink Quartz x35cm
Ref. : PGM-245
Quantity : 1

SUPPLIES

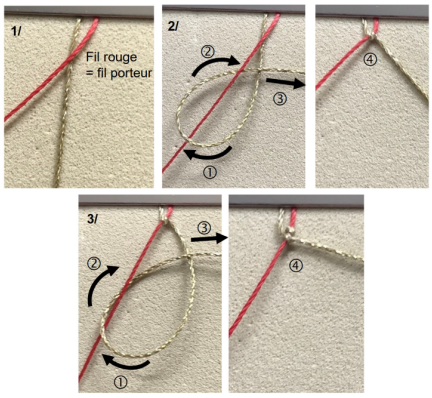
T pins x35
Ref. : OAC-1094
Quantity : 1

Micro-macramé work board 26,5x19 cm x1
Ref. : OUT-018
Quantity : 1

steps

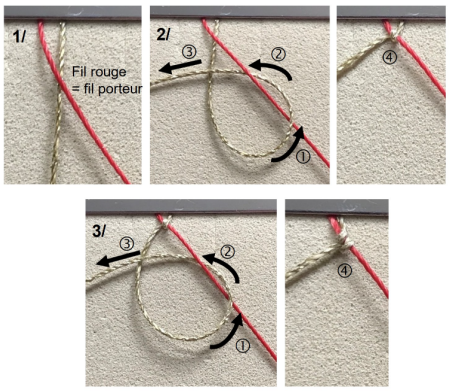
Step 1/38

Learn how to make a **double diagonal half-key** knot**, to the right.**
To do this, take the right-hand thread**(red thread**) and place it diagonally to the left, **above** left-hand thread**(gold thread)**. The red thread is referred to here as the " **carrier thread",** i.e. the one on which we'll tie the knots. The carrying wire is **always above** the thread on which knots are made.
Once the support wire is in position, we'll make 2 knots **with** the left wire**(gold wire)**.
To do this, take the **gold wire** and pass it **over** the supporting wire. Then pass it **under** the supporting wire. Then pull it through the loop created around the supporting wire (top/bottom knot) and tighten to form the knot.
The first half-key knot is now complete. Repeat the above steps to create a 2nd identical knot.
You now know how to create a **diagonal double half-key** to the right!



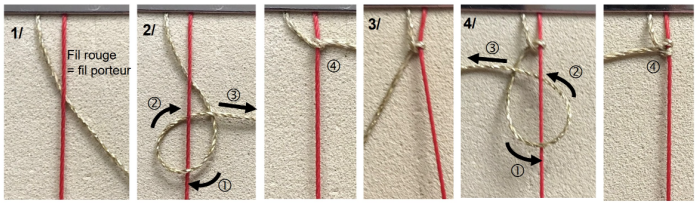
Step 2/38

Learn how to make a **double diagonal half-key** knot**, to the left**.
To do this, take the left-hand thread**(red thread**) and place it diagonally to the right, **above** right-hand thread**(gold thread)**. The red wire is referred to here as the " **carrier wire",** i.e. the one on which we'll tie the knots.
Once the carrying wire is in position, we'll make 2 knots **with** the right-hand wire**(Golden Wire)**.
To do this, take the **golden thread** and pass it **over** the supporting wire. Then pass it **under** the supporting wire. Then pull it through the loop created around the supporting wire (top/bottom knot) and pull tight to form the knot.
The first half-key knot is now complete. Repeat the above steps to create a 2nd identical knot.
You now know how to create a **diagonal double half-key** to the left!



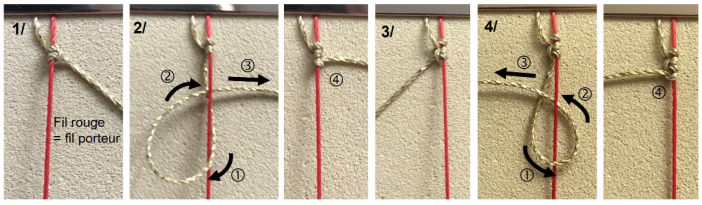
Step 3/38

Learn how to tie an **alternating half-key knot** (chainette) - **Step 1**.
The aim of these knots is to create a "chainette", i.e. a succession of knots around the same thread. To achieve this, the knots are alternated, once on one side and once on the other. For the sake of this example, we'll create a 5-knot chainette.
How it's done :
The red thread is the **supporting thread** (the one on which we'll tie the knots).
1/ Hold the red thread vertically and pass the gold thread **underneath**.
2/ Make **1** half-key **knot** to the right: 1. take the **gold thread** and pass it **on** the supporting wire, 2. then pass it **under** the supporting wire, 3. pull it through the loop created around the supporting wire and 4. tighten to form the knot.
3/ Hold the red wire vertically, then pass the gold wire **under** (red wire) to create a knot in the other direction.
4/ To make **1** half-key **knot** to the left: 1. pass the **gold thread on** the supporting thread, 2. then pass it **under** 3. pull back through the loop created around the supporting thread and 4. tighten to form the knot.
A chain of 2 knots is now complete.



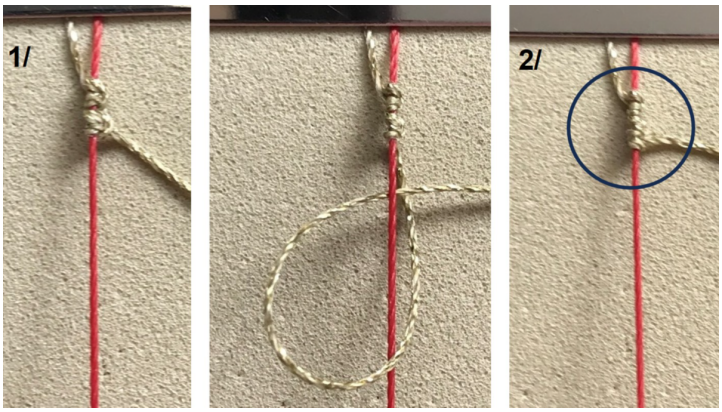
Step 4/38

Learn how to tie an **alternating half-key** (chainette) **knot** - **Step 2**.
Now let's make 2 new alternate knots:
The red thread is the **supporting thread** (the one on which we'll tie the knots).
1/ Keep the red thread vertical and pass the gold thread underneath.
2/ Make **1** half-key**knot** to the right: 1. take the **gold thread** and pass it **on** the supporting wire, 2. then pass it **under** the supporting wire, 3. pull it through the loop created around the supporting wire and 4. tighten to form the knot.
3/ Hold the red wire vertically and pass the gold wire **under** (red wire) to create a knot in the other direction.
4/ To make **1** half-key **knot** to the left: 1. take the **golden thread** and pass it **on** the supporting wire, 2. then pass it **under** the supporting wire, 3. pull it back through the loop created around the supporting wire and 4. tighten to form the knot.
A chain of 4 knots is now complete.



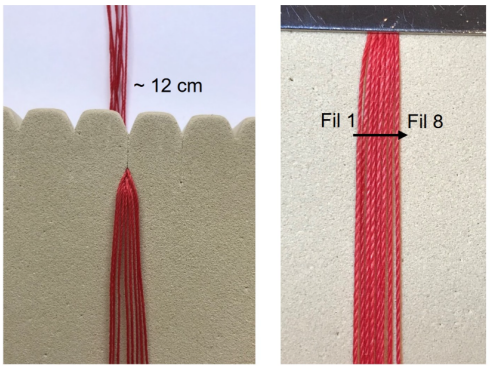
Step 5/38

Learn how to make an **alternate half-key** (chainette) **knot** - **Step 3**.
1/ The gold thread is again passed **under** to create a 5th knot to the right.
2/ A 5-knot chain is created on the red thread.
You've now mastered the **alternate half-key knot** !



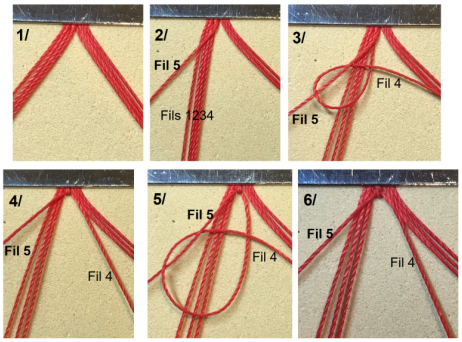
Step 6/38

Now we can start making the bracelet.
To do this, take the 8 145 cm wires. Set aside about 12 cm of wire and attach the 8 wires to your support. If you're using a Macrame Board, use one of the notches to hold the wires in place.
Add a pair of pliers to allow you to separate the 8 wires flat to start the first knots.
In the following explanations, the wires will be named **Wire 1 to Wire 8**, from left to right.



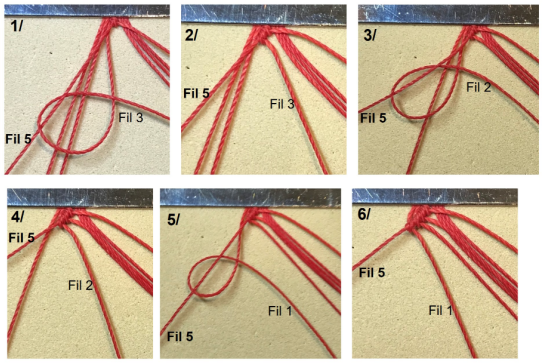
Step 7/38

1/ Separate the 8 wires: 4 on the left and 4 on the right.
2/**Wire 5** becomes the **carrier wire**. Place it diagonally to the left, **above**Wires 1 to 4.
We'll make double half-key knots with each of Wires 4, 3, 2 and 1, in this order (applying STEP 1).
3/ Make **1 knot** to the **right** with**Wire 4** on the supporting wire**(Wire 5)** (top/bottom knot).
4/ Tighten the knot
5/ Tie **1** new **knot** to the **right** with**Thread 4** on the supporting Thread**(Thread 5)** (top/bottom knot).
6/ Tighten the 2nd knot close to the 1st.



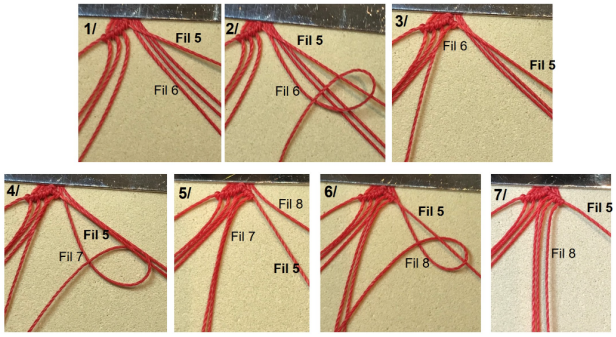
Step 8/38

The carrier wire**(Wire 5**) is always positioned diagonally to the left, above Wires 3, 2 and 1.
STEP 1 (**double** half-key knots) is repeated with Wires 3, 2 and 1.
1/ Make **2 right-hand knots** with**Wire 3** on the supporting Wire**(Wire 5**) (top/bottom knots).
2/ Tighten each knot
3/ Make **2 knots** to the **right** with**Thread 2** on the supporting Thread**(Thread 5**) (top / bottom knots)
4/ Tighten each knot
5/ Make **2 knots** to the **right** with**Thread 1** on the supporting Thread**(Thread 5**) (top / bottom knots)
6/ Tighten each knot



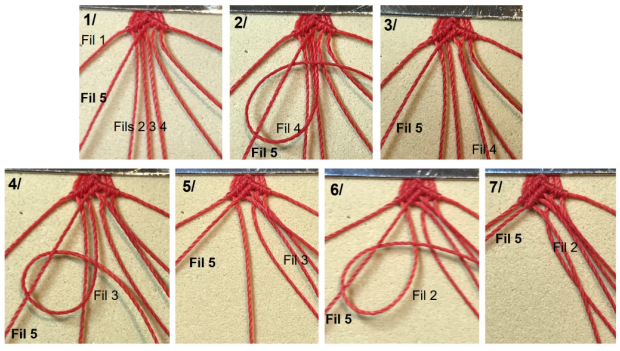
Step 9/38

Repeat on the other side.
Apply STEP 2: **diagonal double half-key** knot**, to the left.**
1/ Place **Thread 5** (support thread) diagonally to the **right**, above **Threads 6, 7 and 8**.
2/ Tie **2** left-hand **knots** with**Wire 6** on the supporting wire**(Wire 5**) (top/bottom knots).
3/ Tighten each knot
4/ Make **2 knots** to the left with**Thread 7** on the supporting Thread**(Thread 5**) (top / bottom knots)
5/ Tighten each knot
6/ Make **2 knots** to the left with**Thread 8** on the supporting Thread**(Thread 5**) (top / bottom knots)
7/ Tighten each knot

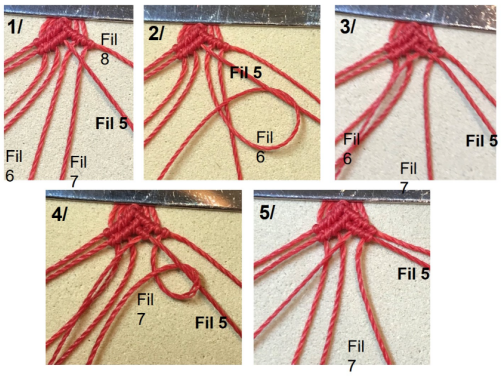


Step 10/38

Wire 5 (carrier wire) is now placed to the left, **on**Wires **4, 3 and 2**. **Wire 1** remains diagonally separated.
We're going to make **double half-key** knots (STEP 2) to the **right** with Wires 4, 3 and 2, in order, on Wire 5 (supporting wire).
1/ Place **Wire 5** (supporting wire) diagonally to the left, **above** Wires 4, 3 and 2.
2/ Tie **2 knots** to the **right** with**Wire 4** on the supporting wire**(Wire 5**) (top/bottom knots).
3/ Tighten each knot
4/ Make **2 knots** to the **right** with**Thread 3** on the supporting Thread**(Thread 5**) (top/bottom knots).
5/ Tighten each knot
6/ Make **2 knots** to the right with**Thread 2** on the supporting Thread**(Thread 5**) (top / bottom knots)
7/ Tighten each knot

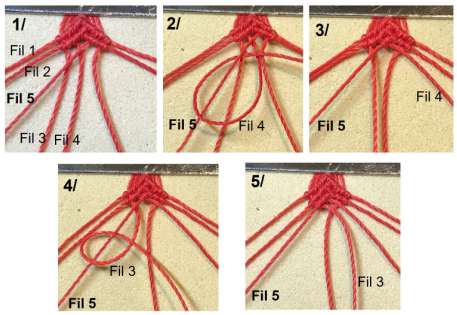


Step 11/38



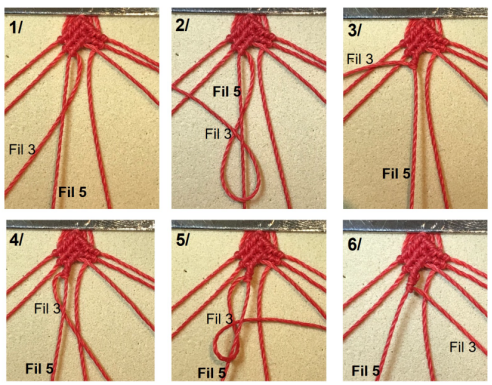
Repeat on the other side.
Apply STEP 2: **diagonal half-key double** knot**, to the left.**
1/ Place **Wire 5** (support wire) diagonally to the right, **above**Wires 6 and 7. Thread 8 is left aside.
2/ Tie **2 knots** to the **left** with**Thread 6** on the supporting Thread**(Thread 5)** (top/bottom knots).
3/ Tighten each knot
4/ Make **2 knots** to the **left** with**Thread 7** on the supporting Thread**(Thread 5)** (top / bottom knots)
5/ Tighten each knot

Step 12/38



Wire 5 (carrier wire) is now placed to the left, **on** Wires 4 and 3. Wires 1 and 2 remain diagonally separated.
We're now going to make **double half-key** knots (STEP 2) to the right with Wires 4 and 3, in order, on Wire 5 (supporting wire).
1/ Place **Wire 5** (supporting wire) diagonally to the left, **above** Wires 4 and 3.
2/ Tie **2 knots** to the **right** with**Wire 4** on the supporting wire**(Wire 5)** (top/bottom knots).
3/ Tighten each knot
4/ Make **2 right-hand knots** with**Thread 3** on the supporting Thread**(Thread 5)** (top / bottom knots)
5/ Tighten each knot.

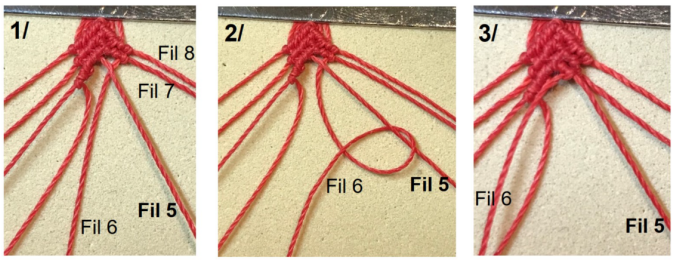
Step 13/38



1/ Hold **Wire 5** (support wire) **vertically down**wards. Now place **Wire 3 under**Thread 5, to the **left**.
2/ Tie **2 left-hand knots** with **Wire 3** on the supporting wire**(Wire 5)** (top/bottom knots).
3/ Tighten each knot
4/ Now pass **Wire 3 under** the supporting Wire**(Wire 5)** to the **right**
5/ Make 2 knots to the **right** with **Thread 3** on the supporting Thread**(Thread 5)** (top / bottom knots)
6/ Tighten each knot

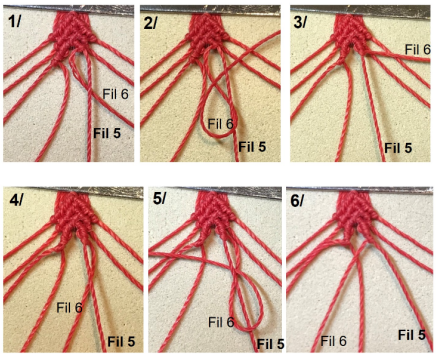
★ Step 14/38

Repeating the wire numbering from left to right, the new carrier wire becomes: " **Wire 5** ".
1/ Place **Wire 5** (carrier wire) **on**Thread 6
2/ Make **2 left-hand knots** with **Wire 6** on **Wire 5** (top/bottom knot)
3/ Tighten each knot



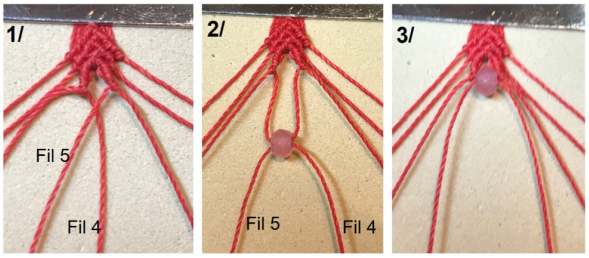
★ Step 15/38

1/ Hold **Wire 5** (support wire) **vertically down**wards. Now place **Wire 6 under**Thread 5 to the **right**.
2/ Tie **2 right-hand knots** with **Wire 6** on the supporting wire**(Wire 5**) (top/bottom knots).
3/ Tighten each knot
4/ Now pass **Wire 6 under** the supporting Wire**(Wire 5**) to the left
5/ Make **2 knots** to the **left** with **Thread 6** on the supporting Thread**(Thread 5**) (top / bottom knots)
6/ Tighten each knot



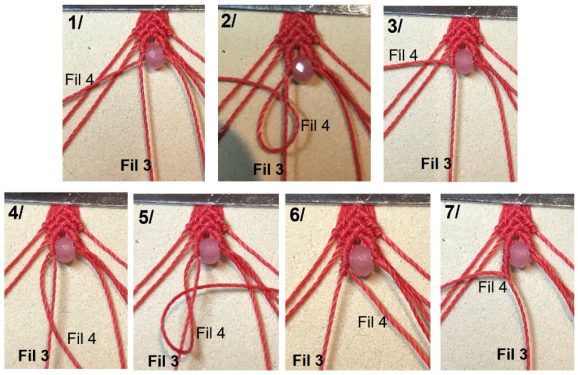
★ Step 16/38

STAGE 16
1/ Repeating the Wire numbering from left to right, the 2 center wires are named **Wire 4 and Wire 5**.
2/ Thread a bead: pass **Wire 4** on one side of the bead hole and **Wire 5** on the other side of the bead hole.
3/ Tighten the 2 wires to set the bead in place.



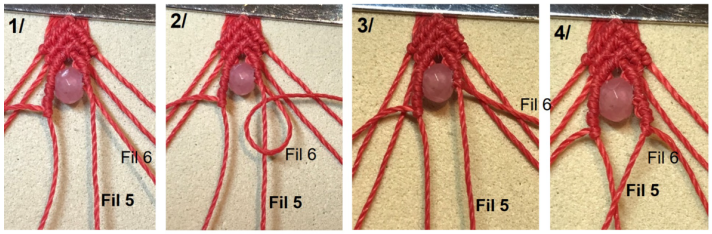
Step 17/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes: " **Wire 3** " and the wire that will make the knots: **Wire 4 = wire coming out of the bead**. Place the carrier Wire**(Wire 3)** **on**Thread 4.
2/ Tie **2 knots** to the **left** with **Thread 4** on the carrier Thread**(Thread 3)** (top/bottom knots).
3/ Tighten each knot
We're now going to make a **5-knot** chain**(alternate half-key knot - STEP 3)**.
4/ Hold the supporting Wire**(Wire 3)** vertically, and place **Wire 4** **under**Wire 3 to the **right**.
5/ Tie **1 right-hand knot** with **Wire 4** on **Wire 3**.
6/ Tighten the knot
7/ Hold the supporting Wire**(Wire 3)** vertically, and place **Wire 4** **under** Thread 3 to the **left to make the next knot**, to the **left.** Continue in this way, moving Wire 4 to make a chain of **5 knots** in total.



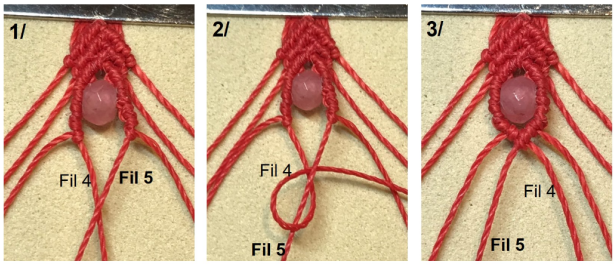
Step 18/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes: " **Wire 5** " and the wire that will make the knots: **Wire 6 = wire that comes out of the bead**. Place the carrier Wire**(Wire 5)** **on**Thread 6.
2/ Make **2 knots** to the **right** with **Thread 6** on the carrier Thread**(Thread 5)** (top / bottom knots).
3/ Tighten each knot
We're now going to make a 5-knot chain**(alternate half-key knot - STEP 3)**.
4/ Hold the supporting Wire**(Wire 5)** vertically, and place **Wire 6** **under**Wire 5 to the **left**. Make 1 knot to the left. Then move **Wire 6** **under**Thread 5 to make **1 new knot** to the **right**. Continue, making a chain of **5 knots** knots.



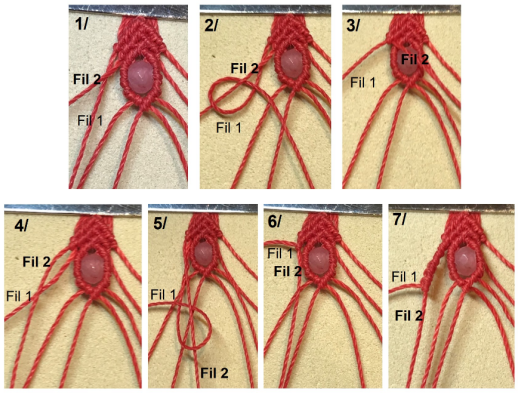
Step 19/38

1/ Place **Wire 5** (Carrier Wire) **on**Wire 4
2/ Make **2 knots** to the **right** with **Wire 4** on **Wire 5** (Carrier Wire).
3/ Tighten each knot.



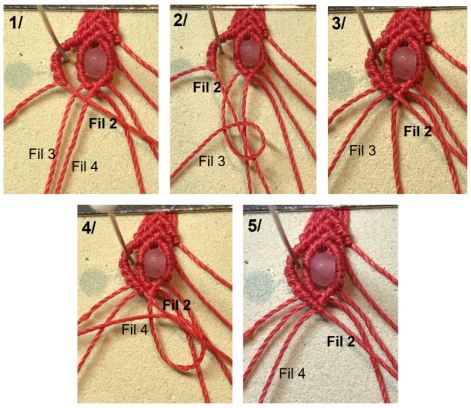
Step 20/38

We're now going to create a **chain** using **Wires 1 and 2**.
1/ Place **Thread 2** (carrier thread) on **Thread 1**.
2/ Make **a right-hand knot** with **Thread 1** on **Thread 2**.
3/ Tighten the knot
4/ Pass **Wire 1** **under**Thread 2 to tie a new knot on the other side.
5/ Tie **1 knot** to the **left** with **Wire 1** over **Wire 2**
6/ Tighten the knot
7/ Continue in this way to make a chain of **12 knots** in total.
Note: the chain is 12 knots for the first complete shape with gem pearl. It will be **14 knots** for all subsequent complete shapes.



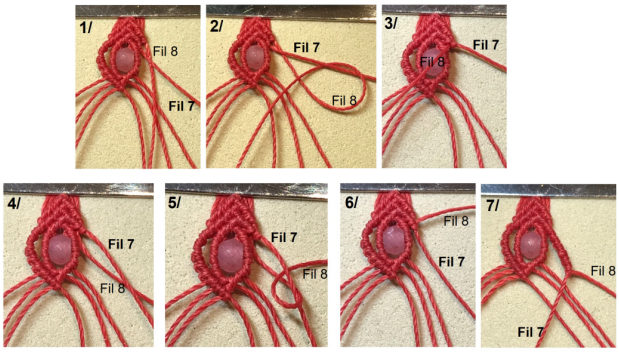
Step 21/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes " **Wire 2** " and the wires that will make the knots: **Wires 3 and 4**. We're now going to connect the left-hand chain to the main structure, using Wires 3 and 4. Place the carrier Wire**(Wire 2)** **on**Threads **3 and 4**.
Tip: use a pin to shape the chain before tying the knots.
2/ Make **2 left-hand knots** with **Thread 3** on the supporting Thread**(Thread 2)** (top/bottom knots).
3/ Tighten each knot so that it lies against the knots of the main structure.
4/ Make **2 knots** to the **left** with **Wire 4** on the supporting Wire**(Wire 2)** (top / bottom knots)
5/ Tighten each knot



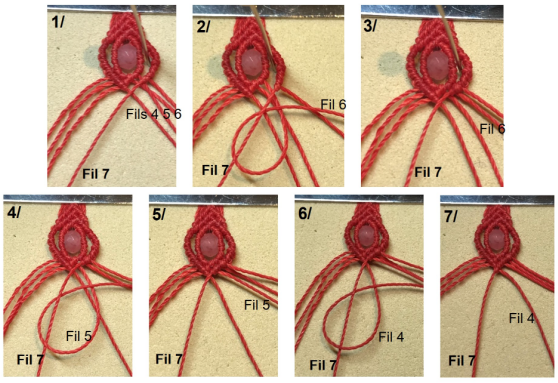
Step 22/38

We're now going to create a **chain** using **Wires 7 and 8**.
1/ Place **Wire 7** (Carrier Wire) **on**Thread **8**.
2/ Tie **1 left-hand knot** with **Thread 8** on **Thread 7**.
3/ Tighten the knot
4/ Pass **Wire 8** **under**Thread **7** to make a new knot on the other side.
5/ Make **1 knot** to the **right** with **Thread 8** on **Thread 7**
6/ Tighten the knot
7/ Continue in this way to make a chain of **12 knots** in total.



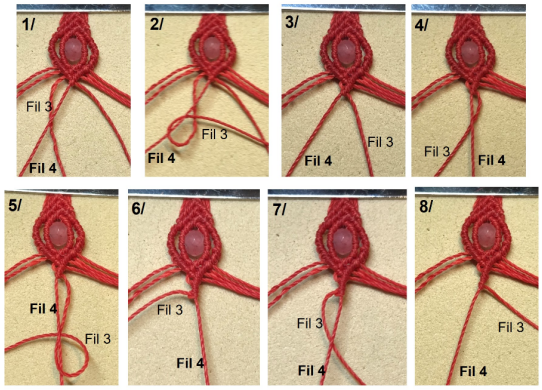
Step 23/38

1/ By repeating the numbering of the Wires from left to right, the new carrier Wire becomes: " **Wire 7** " and the Wires that will make the knots: **Wires 4, 5 and 6**. We're now going to connect the right-hand chain to the main structure, using Wires 4, 5 and 6. Place the carrier Wire**(Wire 7)** **on**Threads 4, 5 and 6.
Tip: use a pin to shape the chain before tying the knots.
2/ Make **2 right-hand knots** with **Thread 6** on the carrier Thread**(Thread 7)** (top/bottom knots).
3/ Tighten each knot so that it lies against the knots of the main structure.
4/ Make **2 knots** to the **right** with **Wire 5** on the supporting Wire**(Wire 7)** (top / bottom knots)
5/ Tighten each knot
4/ Make **2 knots** to the **right** with **Wire 4** on the supporting Wire**(Wire 7)** (top / bottom knots)
5/ Tighten each knot



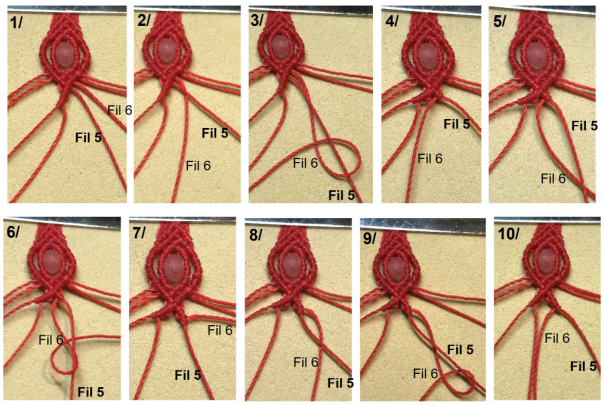
Step 24/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes: " **Wire 4** " and the wire that will make the knots: **Wire 3**. Place the carrier wire**(Wire 4)** **on**Thread 3.
2/ Make **2 knots** to the **right** with **Thread 3** on the supporting Thread**(Thread 4)** (top/bottom knots).
3/ Tighten each knot
4/ Pass **Wire 3** **under**Wire 4 to change sides
5/ Make **2 knots** to the **left** with **Thread 3** on the supporting Thread**(Thread 4)** (top / bottom knots)
6/ Tighten each knot
7/ Pass **Wire 3** **under**Wire 4 to change sides
8/ Make **2 knots** to the **right** with **Thread 3** on the supporting Thread**(Thread 4)** (top / bottom knots)



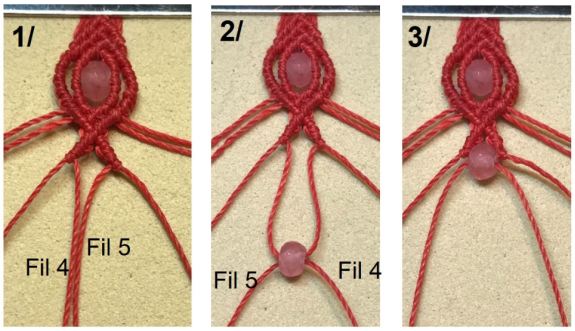
Step 25/38

1/ The new **carrier Wire** is now **Wire 5** and the Wire that will make the knots: **Wire 6**.
2/ Place the supporting Wire**(Wire 5)** **on**Thread 6
3/ Make **2 knots** to the **left** with **Thread 6** on the supporting Thread**(Thread 5)** (top / bottom knots)
4/ Tighten each knot
5/ Pass **Wire 6** **under**Thread 5 to change sides
6/ Make **2 knots** to the **right** with **Thread 6** on the supporting Thread**(Thread 5)** (top / bottom knots)
7/ Tighten each knot
8/ Pass **Wire 6** **under**Wire 5 to change sides
9/ Make **2 knots** to the **left** with **Thread 6** on the supporting Thread**(Thread 5)** (top / bottom knots)
10/ Tighten each knot



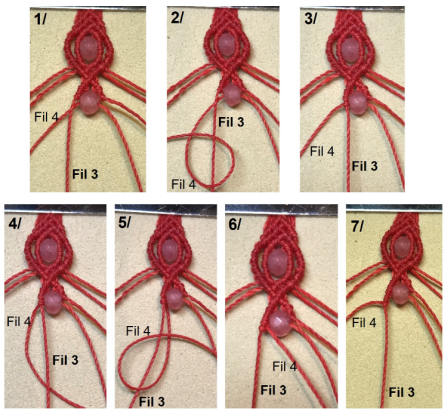
Step 26/38

1/ Repeating the wire numbering from left to right, the 2 center wires are named **Wire 4** and **Wire 5**.
2/ Thread a bead: pass **Wire 4** on one side of the bead hole and **Wire 5** on the other side of the bead hole.
3/ Tighten the 2 wires to set the bead in place.



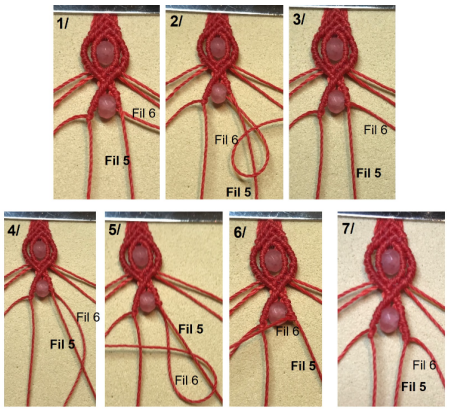
Step 27/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes: " **Wire 3** " and the wire that will make the knots: **Wire 4 = wire coming out of the bead**. Place the carrier Wire**(Wire 3)** **on**Thread 4.
2/ Tie **2 knots** to the **left** with **Thread 4** on the carrier Thread**(Thread 3)** (top/bottom knots).
3/ Tighten each knot
We're now going to make a **5-knot** chain**(alternate half-key knot - STEP 3)**.
4/ Hold the supporting Wire**(Wire 3)** vertically, and place **Wire 4** **under**Wire 3 to the **right**.
5/ Tie **1 right-hand knot** with **Wire 4** on **Wire 3**.
6/ Tighten the knot
7/ Hold the supporting Wire**(Wire 3)** vertically, and place **Wire 4** **under**Thread 3 to the **left to make the next knot**, to the **left.** Continue in this way, making a chain of **5 knots** knots.



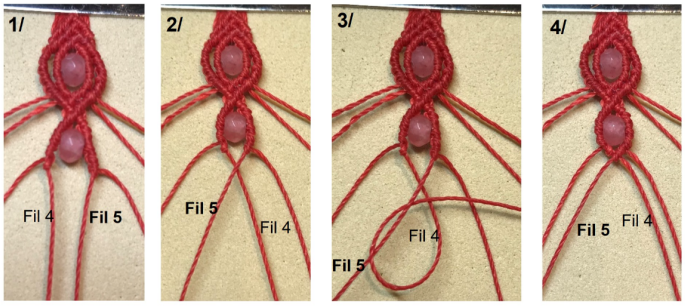
Step 28/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes: " **Wire 5** " and the wire that will make the knots: **Wire 6 = wire that comes out of the bead**. Place the carrier Wire**(Wire 5)** **on**Thread **6**.
2/ Make **2 knots** to the **right** with **Wire 6** **on** the supporting Wire**(Wire 5)** (top / bottom knots)
3/ Tighten each knot
We're now going to make a 5-knot chain**(alternate half-key knot - STEP 3)**.
4/ Hold the supporting Wire**(Wire 5)** vertically, and place Wire 6 **under** Wire 5 to the **left**.
5/ Tie **1** left-hand **knot** with **Wire 6** **on** the supporting Wire**(Wire 5)**
6/ Tighten the knot
7/ Pass **Thread 6** **under**Thread **5** to make 1 new knot in the opposite direction, and continue in this way to make a chain of **5 knots** in total.



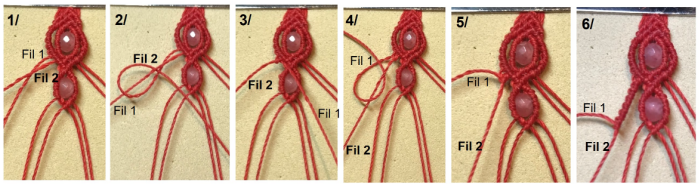
Step 29/38

1/ We're now going to join the 2 parts of the structure.
2/ Place **Wire 5** (Carrier Wire) **on**Wire **4**
3/ Tie **2 right-hand knots** with **Wire 4** on **Wire 5**.
4/ Tighten each knot.



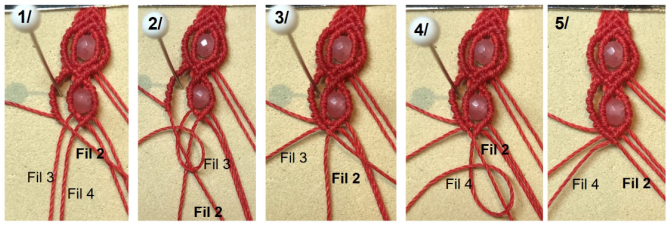
Step 30/38

We're now going to create a **chain** using **Wires 1 and 2**.
1/ Place **Wire 2** (Carrier Wire) **on**Thread **1**.
2/ Tie **a right-hand knot** with **Thread 1** on **Thread 2**.
3/ Tighten the knot
4/ Pass **Wire 1** **under**Thread **2** to make **1** new **knot** to the **left** with **Thread 1** on **Thread 2**.
5/ Tighten the knot
6/ Continue in this way to make a chain of **14 knots** in total.



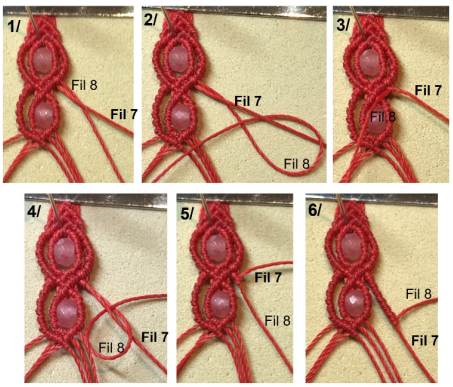
Step 31/38

1/ Repeating the numbering of the wires from left to right, the new carrier wire becomes " **Wire 2** " and the wires that will make the knots: **Wires 3 and 4**. We're now going to connect the left-hand chain to the main structure, using Wires 3 and 4. Place the carrier Wire**(Wire 2)** **on**Threads **3 and 4**.
Tip: use a pin to shape the chain before tying the knots.
2/ Make **2 left-hand knots** with **Thread 3** on the supporting Thread**(Thread 2)** (top/bottom knots).
3/ Tighten each knot so that it lies against the knots of the main structure.
4/ Make **2 knots** to the **left** with **Wire 4** on the supporting Wire**(Wire 2)** (top / bottom knots)
5/ Tighten each knot



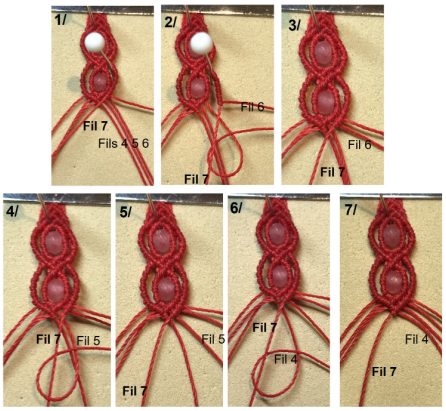
Step 32/38

We're now going to create a **chain** using **Wires 7 and 8**.
1/ Place **Wire 7** (Carrier Wire) **on**Thread **8**.
2/ Tie **1 left-hand knot** with **Thread 8** on **Thread 7**.
3/ Tighten the knot
4/ Pass **Wire 8** **under**Yarn **7** to make **1** new **right-hand knot** with **Yarn 8** on **Yarn 7**.
5/ Tighten the knot
7/ Continue in this way to make a chain of **14 knots** in total.



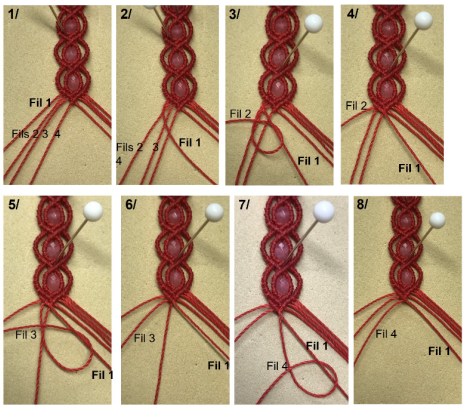
Step 33/38

1/ By repeating the numbering of the Wires from left to right, the new carrier Wire becomes: " **Wire 7** " and the Wires that will make the knots: **Wires 4, 5 and 6**. We're now going to connect the right-hand chain to the main structure, using Wires 4, 5 and 6. Place the carrier Wire**(Wire 7)** **on**Threads **4, 5 and 6**, diagonally to the left.
Tip: use a pin to shape the chain before tying the knots.
2/ Make **2 right-hand knots** with **Thread 6** on the supporting Thread**(Thread 7)** (top/bottom knots).
3/ Tighten each knot so that it lies against the knots of the main structure.
4/ Make **2 knots** to the **right** with **Wire 5** on the supporting Wire**(Wire 7)** (top / bottom knots)
5/ Tighten each knot
6/ Make **2 knots** to the **right** with **Wire 4** on the supporting Wire**(Wire 7)** (top / bottom knots)
7/ Tighten each knot
You can now repeat STEPS 22 to 33 to create a new shape complete with gemstone. Make as many shapes as you need, depending on the length of your bracelet.



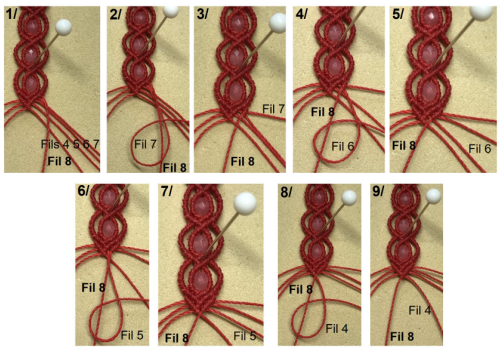
Step 34/38

To finish the bracelet:
1/ By repeating the numbering of the Wires from left to right, the new carrier Wire becomes: " **Wire 1** " and the Wires that will make the knots: **Wires 2, 3 and 4**.
2/ Place the supporting Wire**(Wire 1)** **on**Wires 2, 3 and 4.
3/ Tie **2 knots** to the **left** with **Wire 2** on the supporting Wire**(Wire 1)** (top/bottom knots).
4/ Tighten each knot to lie against the knots of the previous row.
5/ Tie **2 knots** to the **left** with **Thread 3** on the supporting Thread**(Thread 1)** (top / bottom knots)
6/ Tighten each knot
7/ Make **2 knots** to the **left** with **Wire 4** on the supporting Wire**(Wire 1)** (top / bottom knots)
8/ Tighten each knot



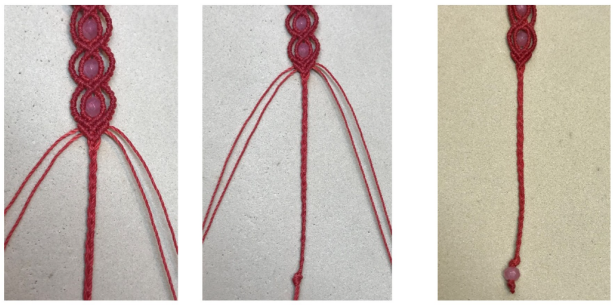
Step 35/38

The same procedure is followed on the right-hand side.
Repeating the thread numbering from left to right, the new carrier thread becomes: " **Thread 8** " and the threads that will make the knots: **Threads 4, 5, 6 and 7**.
1/ Place the carrier Wire**(Wire 8)** **on**Wires 4, 5, 6 and 7.
2/ Make **2 right-hand knots** with **Thread 7** on the supporting Thread**(Thread 8)** (top/bottom knots).
3/ Tighten each knot to lie against the knots of the previous row.
4/ Make **2 knots** to the **right** with **Thread 6** on the supporting Thread**(Thread 8)** (top / bottom knots)
5/ Tighten each knot
6/ Make **2 knots** to the **right** with **Thread 5** on the supporting Thread**(Thread 8)** (top / bottom knots)
7/ Tighten each knot
8/ Make **2 knots** to the **right** with **Thread 4** on the supporting Thread**(Thread 8)** (top / bottom knots)
9/ Tighten each knot



Step 36/38

To finalize the bracelet, isolate the 2 wires on the left and right and take the 4 wires in the center to make a braid to the desired length.
For the braid, take 1 thread / 2 threads / 1 thread to make it. Finish with a knot. You may wish to add a gemstone after the knot. To do this, you can cut 2 of the 4 wires coming out of the knot, burn the end, and slip a pearl onto the remaining 2 wires. Create a new knot with the 2 wires and cut off the excess. Burn the end with a lighter. Next, cut the 2 x 2 side wires and burn the ends.



★ Step 37/38

Last step: use one of the cut wires to make the slip knot to finish the bracelet.
If you're a beginner and don't know how to make this type of knot, I invite you to take a look at the data sheet: How to make a simple slipknot?

★ Step 38/38

Now it's up to you!
You can give free rein to your desires by varying the colors of the wire and gemstones used.

Result
