### *How to make a silver ring*

Looking for a silver ring that's both elegant and original? Make it yourself from A to Z in this new video! It's so satisfying to create your own jewelry.

In this video, Lucie shows you how to make a silver ring set with natural Amazonite and Labradorite stones. If you prefer Amethyst, Lapis Lazuli, Moonstone or another stone, simply choose your favorite cabochons from our wide selection of [gemstone cabochons](#).

This silver ring for women is composed of a beaded wire ring body and three glued settings, in which the fine stone cabochons are fixed with a little jewelry glue. In this tutorial, Lucie shows you how to solder bonded settings to the ring body, using two techniques:

- Solder while holding the tweezer in your hand.
- Solder with the help of a third hand. This tip is very practical, especially for positioning the ring correctly from the outset. But if you don't have a third hand, you can clamp the tweezers between two jeweler's stacks. That works too!

To make a ring yourself, it's imperative to have the right equipment in your workshop. At the bottom of the page you'll find everything you'll need to create this ring set with fine stones. With patience and perseverance, you'll be able to create a custom-made silver ring.

Before you start creating this ring, don't forget to take care of yourself! Protect yourself with a mask, a smock and a pair of gloves, and work in the best possible conditions in a well-ventilated area equipped with an extractor hood. Looking for new DIY projects? On our YouTube channel, you'll find a wealth of techniques, [detailed tutorials](#) and tips on how to [learn traditional jewelry-making on your own](#).

## Which material to use for Make a 925 Sterling Silver Ring with Amazonite and Labradorite Natural Stones?

### SUPPLIES
