How to make polymer clay flowers?

Do you already have some ideas for your festive outfits? Because we've already suggested what jewelry to make for the occasion! Or even better, we've got some ideas for jewelry gifts. Whatever you choose, this tutorial is for you. Because what could be better than a pair of earrings made with love? Discover elegance with our polymer clay golden flower earrings. Designed with precision by Carole, they add a touch of glamour to your look. Lightweight and comfortable, they're perfect for any occasion. Give them as gifts or add them to your jewelry collection for a touch of nature and gold in your life.

Carole, one of the winners of the Cré'Academy, gives you an easy-to-follow explanation of how to make pretty golden flowers in polymer clay. Have you followed the Cré'Academy? We've organized a DIY jewelry contest so that you too can submit your own tutorial to our site. If you're interested, please let us know. And don't forget to keep an eye out for future editions. You'll find the jewelry of the other winners in our November DIY jewelry collection, "Perlement votre". A collection made by our customers for you!

For this polymer clay earring tutorial, Carole has chosen to make a pair of gold earrings, but you can also choose to make them in silver, bronze or even green or red! The choice is yours, and we're sure it'll be the right one. Whether you're a beginner or an expert, this tutorial is accessible to everyone, provided you have the necessary equipment, including a kiln! If you don't, it will be difficult to bake your flowers, as Cernit is a polymer clay that can be baked in an oven. Don't hesitate to consult our technical sheets on polymer clay for more information.

Share your creations with us on our Facebook page and Instagram account. We love to see what you make!

Which material to use for Polymer clay golden flower earrings?

SUPPLIES

Cernit Number One 56gr Black (n°100)
Ref. : CERNIT-051
Quantity : 1

Cernit Number One 56gr Brown (n°800)
Ref. : CERNIT-060
Quantity : 1

12x10mm Flower earstuds - with closed ring - Fine Gold Plated x2
Ref. : EAR-681
Quantity : 1

Jumprings open 10x0.7mm fine Gold plated x50
Ref. : OAC-333
Quantity : 1

Glossy Transparent shiny Cernit 30 ml
Ref. : OUT-102
Quantity : 1

Mica powder for Polymer Clay Cernit Sparkling Metallic gold 050 x5g
Ref. : TOOL-832
Quantity : 1

SUPPLIES

Artémio - Set of 3 polymer clay cutters with 2 handles x1
Ref. : ATT-528
Quantity : 1

23x2cm Acrylic Roller for polymer clay - Transparent x1
Ref. : ATT-530
Quantity : 1

Imperia pasta machine Sfogliatrice type
Ref. : OUTIL-525
Quantity : 1

steps

★ Step 1/16

To begin, cut a piece of brown Cernit paste.

★ Step 2/16

To condition the dough, cut it finely with a blade, then gather the pieces in your hand to form a compact ball. Knead it in your hands to warm the dough. Roll out the dough with a rolling pin.

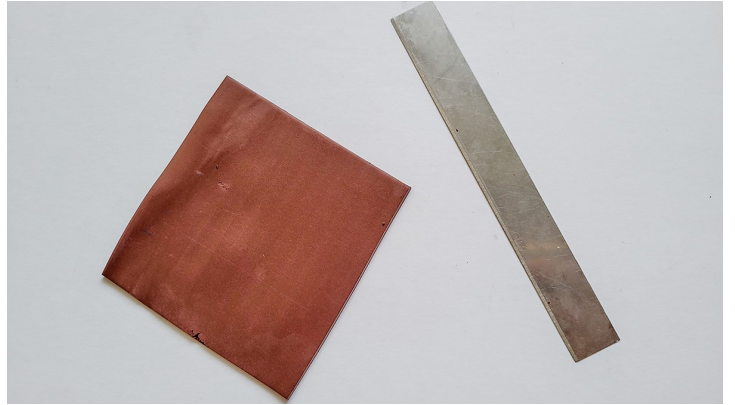

★ Step 3/16

Run through the machine several times.

★ Step 4/16

The result is a square of dough.

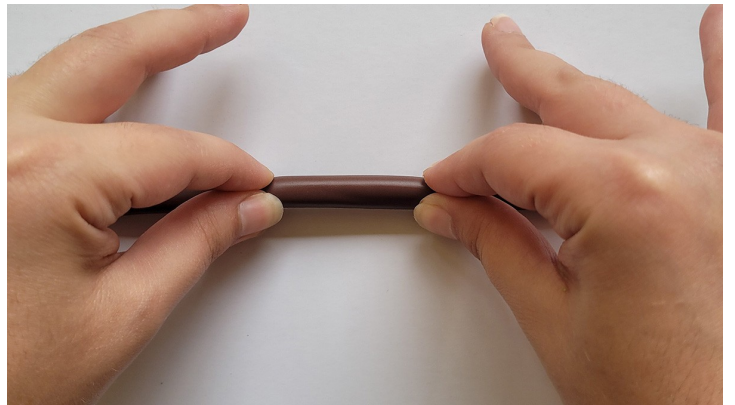

★ Step 5/16

Roll this square under your hands to form a tube.

★ Step 6/16

Pinch the entire length of the tube under your hands. Cut a very thin piece.

★ Step 7/16

The result is a petal.
All the petals of the flower will be molded in the hand.

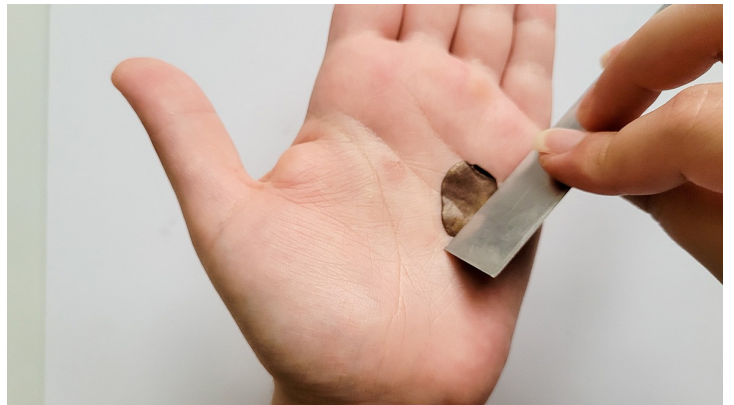

★ Step 8/16

Use the index finger and thumb of the opposite hand to lengthen the petal to the desired size.
The petal should be neither too thick nor too thin to avoid breaking.

★ Step 9/16

Make ridges with your blade on the non-sharp edge.

★ Step 10/16

Take the golden CERNIT powder and, using your forefinger, gently place the powder on the petal.

★ Step 11/16

When you're happy with the size of your petal, do the same for the others. For a total of 6 petals per flower. Curl the edges of the petals slightly for a more realistic look.

When assembling the flower, be careful to fit the petals one on top of the other. But once the dough has been powdered, it will no longer stick together.

Make sure that the narrowest edge of the petal is not covered with powder on either side.

This will ensure a glue-free flower.

If you're new to making polymer clay flowers, you can cut a small round of clay (without powder) and place each petal on the round.

★ Step 12/16

Mount the flower as follows.

★ Step 13/16

Take some black CERNIT paste and make small spheres, place them in the center of the flower. Press well.

★ Step 14/16

Preheat oven to 130°C.

Bake the two flowers on a baking sheet for 22 minutes.
Leave the flowers to stand until they have cooled.

★ Step 15/16

Drill a hole in both pieces using a hand chuck.

★ Step 16/16

Varnish both flowers with Cernit clear gloss varnish and leave to dry completely.

For a complete finish, you can powder the backs of the flowers at this stage, then varnish them.

Mount your earrings with 10mm gold-plated hoops and gold-plated flower studs.

Your earrings are finished and ready to wear.
