*How to customize a wooden stopper?*

To coincide with the release of the new wooden stopper by Puca®, our creative partner Les Perles par Puca® offers you this new customization scheme. The perfect addition to your collection of customized pearl stoppers. This square wooden stopper is perfect for wine bottles or water carafes with standard-sized necks. Please note, however, that it is purely decorative and will not seal your bottles hermetically.

To make this creation, you'll need to weave Arcos® beads with 15/0 seed beads and toupies beads around a cabochon by Puca®. At the end of your weaving, you'll see a pretty flower shape appear. All you have to do now is glue your weaving to the cap, and your creation is complete.

For those of you who missed the previous Puca® cork diagrams, here they are:
