How to make dangling earrings?

Since the end of winter, bubble jewelry has been the trend. You know, those rounded or organic jewelry shapes that are everywhere these days. Add to that a few springtime colors and you've got the recipe for our new collection Sparkling Spring. On the program: earrings, bracelets, necklaces...

Discover in this tutorial how to create dangling ear rings by mixing materials and colors. Ideal if you're just starting out in jewelry-making, these earrings are accessible to beginners and quick to make. What's more, they'll add a touch of pizzazz to your everyday outfits!

To make these dangling earrings, you'll need resin pear beads, irregular beads, round flower beads and resin cabochons to glue onto your studs. You can personalize them by changing the color of the cabochons and resin pearls from the selection on our website. Why not create them in Celadon and Amber, or in Dark Green and Sage? Let your imagination run wild!

If you reproduce this tutorial, we invite you to share your creation with us on social networks, mentioning Perles & Co on your post. We love to see the beautiful creations you make!

steps

★ Step 1/3

Glue the cabochon to the ear stud using Hasulith glue.

★ Step 2/3

Next, take your round-headed nail and slide in two interlocking rondelle beads. Then thread the nail through the pear bead, followed by the irregular bead. Form a loop at the top of the stem. If you're a beginner and don't know how to do this, I invite you to consult our data sheet, which will teach you how to make a loop on a nail.

Be careful not to close the loop completely.

★ Step 3/3

To finish your earring, pass the ring of the ear stud through the loop of your round-head stud. Then, using flat-nose pliers, close your earring securely. Follow the same steps to make the second earring, and your pair is complete!
