How to make a bead

To coincide with the launch of the new Lipsi® range by Puca®, our partner offers you a new pattern: Perle One. This tutorial will teach you how to weave small beads using Lipsi® glass beads, PureCrystal bicones and seed beads. Like the Perle Two pattern, this creation is infinitely adaptable. You can make several elements and then assemble them into necklaces, earrings, bracelets and more.

Here, Puca® suggests you intersperse woven beads with other small beads and mount them on gold-plated wire or chain to make a necklace or bracelet. You can choose round resin beads, for example. In her pattern, Puca® has used Ice Slushy Blue Curacao beads, but we have a wide choice of colors on the site, so feel free to have a look and mix the bead finishes by Puca® for an even more creative result!
