### *How to make trendy earrings yourself?*

In this tutorial, I'll show you how to make dangling earrings quickly and easily in just two steps. You'll need just three elements: two pendants, two studs and two cabochons. As you'll see, it's a very simple tutorial, accessible to everyone.

To make my colorful earrings, I chose drop-shaped pendants in pastel colors, pretty soft hues ideal for spring and summer. They come in several colors, so I hope you'll like them as much as I do.

I chose to make tone-on-tone earrings, and I'll show you different versions at the end of this tutorial. But you can mix colors or choose another shape of stud. Don't hesitate to have a look at what's on offer on the site, you're sure to find your favorite.

On the technical side, all you need to know is how to open a ring and close it properly. It's the basic technique for creating DIY costume jewelry. To do this, you'll need two good jewelry pliers.

If you make this DIY creation again, show us the result by sharing a photo on social networks with #perlesandco or by mentioning @perlesandco. We love seeing what you create.

Use a ring to secure the pendant. To help you, we have a video that explains [how to open and close a ring](#).
