*How to make an ultra-simple Miyuki bracelet?*

These little easy beaded bracelets are a must-have accessory for your wardrobe. They're simple to make, simple to put on and simple to give away. In fact, thanks to the adjustable fastening system, you don't need to know the wrist size of the person you want to give it to. Its sliding clasp bead, more commonly known as the stopper bead, allows you to adjust the size of the bracelet and open and close it without assistance. You can customize your bracelet by choosing from dozens of colors of braided nylon thread; 0.5 mm and more than 1000 references of Miyuki Delica 11/0 beads. Follow our simple bracelet tutorial pas à pas sans prise de tête.

The stopper bead can be replaced by a macramatic sliding knot or a flowing capuchin knot. However, using a stopper bead as a clasp has many advantages:

- The finish is stronger compared to a sliding knot

.

- The bracelet is easier to make

.

- The bracelet is faster to make

- The result looks better

If you want to make lots of bracelets, stopper beads in gold filled or laminated gold may seem like a reasonable budget. But if you buy them in packs of 5 (i.e. 10 pearls), you'll pay a reduced price. That's why we've decided on a tutorial with 10 bracelets. What's more, you only need a hundred or fewer beads per bracelet. Each 8g bag contains around 1400. So you can choose fewer colors if you want to keep your shopping cart low. Finally, the wire is sold in 10-meter lengths. For an adult bracelet, you'll need to cut between 30 and 35 cm of wire. So you can make more than 30 bracelets with a single color of wire.

These bracelets are perfect for making lots of little end-of-year gifts, for example.
