How to personalize hair clips?

Personalized rhinestone hair clips are much more than just a hair accessory. Whether you want to add a touch of sparkle to your everyday look, elevate your style for a day at the beach, or add a sophisticated note to an evening outfit, these hair clips are the perfect option.

The summery decorations, adorned with cherry, lemon and flower motifs, bring a unique freshness and cheerfulness that evoke the beautiful days.

During the day, these hair accessories add a touch of discreet refinement to a simple hairstyle, whether at the office or out with friends.

For a day at the beach, give free rein to your imagination by incorporating bolder, more colorful patterns, which will perfectly complement a sunny outfit. In the evening, opt for more sophisticated and glamorous compositions, using glue-on rhinestones that catch the light and add dazzling shine to your look.

Each of your DIY creations becomes a unique piece, reflecting your mood, your inspiration of the moment and your unique sense of style.

This tutorial is accessible to both beginners and advanced users, as it doesn't involve any major difficulties: all you need to do is glue on rhinestones or glue-on elements to transform your hair clips into trendy accessories. To help you, take a look at our technical datasheet.

My tip for ensuring that rhinestones adhere as well as possible to the alligator clip: lightly sand the surface of the clip where you want to attach a rhinestone or adhesive element. Sanding will roughen the surface, increasing the glue's adhesion. Use fine emery paper to avoid damaging the pliers, and dust carefully before applying glue and rhinestones. Your rhinestones will stay firmly in place.

Once your creation is complete, handle the half-moon hair clip with care, as the rhinestones may come loose.

Which material to use for Seashell and summer fruit hair clips with PureCrystal rhinestones?

SUPPLIES

Ref. : STR-629
Quantity : 1

3mm PureCrystal STICK-ON RHINESTONES - Crystal Soft Yellow Ignite x36
Ref. : STR-630
Quantity : 1

steps

★ Step 1/5

Rhinestone glue is a strong glue that requires a drying time of 24 to 48 hours. To help the rhinestones hold better, you can lightly sand the area before gluing.

1. The 3-sun hair clip

Glue the first ACX-477 sun in the center of the clip using Strass 244 glue, then glue the other 2 suns on either side, staggering them slightly downwards. Leave to dry for 24 to 48 hours.

★ Step 2/5

2. The golden shell hair clip

Select gold elements from the ATT-107 assortment. Position the gold elements on the clip to choose the composition that suits you best. Then glue the elements one by one using Strass 244 glue. Repeat on the other side of the clamp. Leave to dry for 24 to 48 hours.

★ Step 3/5

3. Cherry alligator clip

Position the rhinestones on the pliers to choose the composition that suits you best. Each cherry is made up of 2 STR-613 rhinestones and a shuttle. Glue 2 PureCrystal Light Siam STR-613 rhinestones side by side, then a green shuttle just above to symbolize the leaves of the cherries, using Strass 244 glue. To make positioning the rhinestones easier, you can use the [rhinestone positioning pen](#). Repeat the operation on the other side of the pliers. Leave to dry for 24 to 48 hours.

★ Step 4/5

4. Lemon clip

Position the PureCrystal Soft Yellow Ignite STR-630 rhinestones on the pliers to choose the composition that suits you best.

Then glue the PureCrystal Soft Yellow Ignite STR-630 rhinestones one by one to form a lemon, then the 2 shuttles above to form the 2 leaves, using Strass 244 glue.

To help you position the rhinestones, you can use the rhinestone positioning pen.

Repeat the operation on the other side of the pliers.

Leave to dry for 24 to 48 hours.

★ Step 5/5

5. Flower clip

Position the PureCrystal rhinestones on the clip to choose the composition and distribution of flowers that suit you best. You can alternate rhinestone colors, for example, placing a crystal rhinestone in the center and Crystal Soft Rose Ignite rhinestones all around, or vice versa.

Glue the first rhinestone in the center of the flower, then glue 5 rhinestones around it to form a flower using Strass 244 glue

To make rhinestone positioning easier, you can use the rhinestone positioning pen.

Repeat the operation on the other side of the pliers.

Leave to dry for 24 to 48 hours.
