

RECTANGULAR SILVER GLITTER EARRINGS

By : Tiffanie Perles&Co

Easy

5 minutes

How to make glitter earrings?

These earrings are very easy to make. Choose the color of your crystal cabochons, silver or gold metal studs and pendants, and off you go! In less than 5 minutes, you'll be creating personalized earrings. Crystal cabochons add a chic touch to earrings. Whether at a party or on vacation, you're sure to make a splash with your colorful crystal jewelry! The cabochons used are by Aurora. They are high quality XXL crystal cabochons at an affordable price. They make it easy to create original jewelry. As for the pendants, there's a wide choice to choose from. We offer rectangular acrylic glitter pendants, but you can also use other pendants. Find other options for customizing your earrings in the product variations section of the hardware list.

Wear these large earrings with a simple outfit, such as a black dress or white blouse. With the other pendant proposals, you can also create earrings to match the color of your outfit. For example, with a peachy floral top, you could use the pastel orange marbled pendants (reference PLA-392) with Crystal Peach Delite cabochons (WST-568) or pink cabochons (WST-795). You could also match them to your handbag or another accessory. Feel free to personalize your earrings and show us the result on social networks: [Instagram](#) or [Facebook](#).

Which material to use for Rectangular silver glitter earrings?

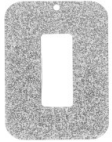

SUPPLIES

Kit of 3 Pliers professional quality for jewelry - Chain nose pliers, Cutting pliers, Round nose pliers
Ref. : OTL-580
Quantity : 1

steps

★ Step 1/3

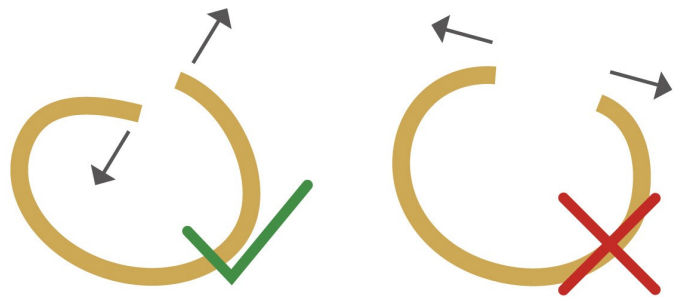

Place the cabochon in the ear stud crimp. Hold it in place and fold back one of the crimp prongs with flat-nose pliers. Here's a video showing you [how to set crystal cabochons](#).

★ Step 2/3

Next, fold down the claw that is completely opposite the first one. Then fold down the other two.

★ Step 3/3

Use two jewelry pliers to open a ring. You need to rotate the ends, not spread them apart, otherwise you'll deform the ring. Slide the nail and pendant into the ring, then close it by turning the ends towards each other. Twist back and forth a little to ensure that the two ends of the ring stick together.
