How to make a multirang necklace

Got a few minutes to spare? Here's an express tutorial on how to make a stainless steel multi-row necklace with heart pendants. Easy to make, even for beginners, just follow the three simple steps detailed below!

This little three-row necklace is the ideal DIY jewel to enhance an everyday outfit. It adds a discreet touch of elegance, ideal for enhancing the décolleté of a dress or the indentation of a blouse.

I've chosen to make this necklace in stainless steel, positioning it very close to the neck. But you can adjust the length to suit your style. To help you calculate the length of a necklace, please refer to our technical data sheet. Only one clasp is needed to fasten this women's necklace around your neck. In fact, the clasp I used is a multi-rang clasp, with three closed rings for easy attachment of the three chains.

This magnetic clasp will enable you to delicately superimpose three chains of different lengths, while achieving a harmonious, balanced effect. In addition to being very practical, the magnetic clasp ensures a secure hold while making it easy to put the necklace on.

This multi-row necklace is fully customizable. Choose other motifs from our wide selection of stainless steel pendants and charms. And why not make a silver version to vary the style. To hang charms and pendants from stainless steel chains, there are two solutions: slide them directly onto the chain, if they are hollowed out or if the attachment is wide enough, or use open rings.

Have you completed this tutorial? We love to see your creations, so don't hesitate to show us the result on social networks by mentioning us or with the hashtag #perlesandco.

Which material to use for Trio of gold-plated stainless steel heart pendant necklaces?

SUPPLIES

Ref. : ATT-827
Quantity : 1

11.5cm Flat pliers by Perles & Co - Glitter Mint x1
Ref. : ATT-828
Quantity : 1

steps

★ Step 1/4

Cut 3 pieces of chain. 37.5 cm for the gold and white chain, 40 cm and 45 cm for the gold chain. If necessary, change the dimensions to suit your preferences.

★ Step 2/4

Take the 40cm piece and, using a ring and two flat, round-tipped pliers, thread the heart charm through the center. Then thread 2 moon charms on either side of the heart, equally spaced.

★ Step 3/4

Pass the second piece of chain through the heart pendant as shown. Pass the chain inside, outside and then inside again.

★ Step 4/4

Then attach the chains to the clasp. Using a ring, thread the chain ends on either side of the clasp. First the gold and white chain, then the gold chain with the heart and moon charms, and finally the gold chain with the heart pendant.
