How to make earrings with crystal beads?

Have fun creating sparkling little crystal earrings. This quick jewelry DIY is perfect for adding an understated touch of color to your wardrobe. Indeed, these earrings have colors that are both soft and warm without being overly bright colors. These pearl stud earrings are the perfect accompaniment to mid-season outfits, whether it's a floral blouse or a simple white blouse. They're very easy to make, even for beginners. In this tutorial, you'll learn how to form a loop on a flat-headed nail. If you're a complete beginner in costume jewelry making, I suggest you watch this video to see what you need to do: [How to make dangling earrings with pearls?](#)

These earrings are made from colored [10 mm resin beads](#), [6 mm PureCrystal crystal beads](#) and gold flower rondelles. The pearls used come in dozens of different colors, so feel free to personalize your earrings. Yellow PureCrystal pearls are a brand-new color of PureCrystal crystal. The color is Reinvented Dark Jonquil. This color is available in other pearls and cabochons.

To set off these pearls, I chose some very cute and poetic flower stud earrings. I've added suggestions for silver flower stud earrings in the product variations section of the equipment list. Not all gold studs are available in silver.

Which material to use for Colorful crystal and pearl earrings?

Ref. : STQ-908
Quantity : 2

10mm Matte effect resin bead - Coral Red x1
Ref. : STQ-910
Quantity : 2

steps

★ Step 1/2

Thread a 10 mm opaque resin bead, a flower rondelle and a 6 mm PureCrystal crystal bead onto the nail. Bend the nail to form a right angle 1 mm after the hole in the last bead. Recut the nail 8 mm from the angle.

★ Step 2/2

Form a loop with fine-tip pliers by grasping the end of the stud and turning it away from the angle. Before closing the loop, slide in the ring of the ear stud you've chosen. You can use a pair of flat-nose pliers to bring the end of the stud ring up against the stud.
