How to make a bracelet from glass beads?

The new Amos: Stardust® collection has arrived. Our partner Les Perles par Puca® has created a bracelet called Astoria.

To make this bracelet, Puca wove Arcos® pearls with Minos® by Puca® pearls, PureCrystal spinning tops, 15/0, 11/0 and 8/0 seed beads. In her pattern, Puca suggests making this bracelet in blue and silver tones. Not a fan of blue? No problem! On our site, you'll find a wide choice of [Arcos by Puca® bead](#) colors to make a personalized piece of jewelry in the colors that suit you.

Making the bracelet is pretty straightforward: just weave the elements one after the other and add a clasp. In this diagram, Puca® suggests using a stopper bead as the clasp system. You'll see in the hardware list that it's actually a ready-made clasp to be added to the ends of your bracelet. This is very practical if you're planning to give a bracelet to a loved one and don't know their wrist size. Alternatively, you can simply choose a lobster clasp with a ring to close your bracelet. As a reminder, for a 17 cm bracelet, Puca® has woven 10 elements.
