How to make a bracelet with glass beads?

New pearl colors have arrived at Perles and Co: Stardust Green, Stardust Blue, Stardust Amethyst and Stardust Beige. These colors are part of the Samos® pearl range from our partner Les Perles par Puca®. To mark the occasion, our partner offers you a tutorial on how to make a chic, refined bracelet, highlighting the purple (amethyst) and gold tones. Discover today the Astrée bracelet by Puca®.

This tutorial is designed for intermediate-level designers. However, if you're new to beading, you can still make it, as long as you carefully follow the steps detailed in the diagram. For the bracelet, although purple and gold were chosen for their harmony and elegance, you can easily personalize your bracelet by opting for other shades of Samos® pearls, in Stardust or not.

You can wear this bracelet with a chic minimalist outfit: purple and gold complement neutral colors perfectly for an elegant, understated ensemble, with a white shirt for example. On the other hand, in a bohemian style, the bracelet goes very well with flowing garments, such as a long floral-print dress or a linen top, adding a bright, subtle note while remaining light and natural. This jewel is therefore the ideal accessory to enrich both styles with finesse.

Which style do you prefer?
