How to make an Easter decoration with iron-on beads?

Looking for a creative, fun and colorful way to celebrate the arrival of spring? This tutorial is for you! Here's how to make an Easter decoration using HAMA beads, an easy-to-implement handicraft activity ideal for keeping young and old busy during the vacations or at weekends. Perfect for creating a cheerful, festive atmosphere at home! HAMA beads, also known as iron-on beads, are very easy to handle. They are placed on a picot plate to form a pattern, then fixed with an iron and ironing paper for Hama Mini Midi and Maxi beads. The result is always very satisfying: beaded characters or shapes that can be hung, placed on a shelf, or even transformed into a decorative garland.

In this special Easter tutorial, we'll guide you step-by-step through the creation of two adorable, emblematic characters: a cute little yellow chick and a funny bunny with big ears. In addition, you can make six Easter eggs in a variety of patterns, to be personalized with the colors of your choice. To give free rein to your imagination, you can personalize your creations with our wide choice of Hama Midi ironing bead colors available on our site.

Accessible from age 6 with the help of an adult, this DIY activity requires few materials: HAMA beads, a suitable plate, ironing paper and an iron. Get the whole family involved in this convivial activity and create a 100% DIY decor, full of charm and good humor!

Which material to use for Easter DIY: create a decoration with Hama beads?

steps

★ Step 1/9

The chick: Place the Hama beads as shown in the photo.

★ Step 2/9

Egg n°1: Arrange the beads starting from the 6th picot row.

★ Step 3/9

Egg n°2: Arrange the beads starting from the 6th picot row.

★ Step 4/9

Egg n°3: Arrange the beads starting from the 6th picot row.

★ Step 5/9

Egg n°4: Arrange the beads starting from the 7th picot row.

★ Step 6/9

Egg n°5: Arrange the beads starting from the 7th picot row.

★ Step 7/9

Egg n°6: Arrange the beads starting from the 7th picot row.

★ Step 8/9

Cover the plate with ironing paper or baking paper, then run the iron over it so that the heat glues the beads together.
Gently peel off the plate.

★ Step 9/9

Thread wire through the bead to create a suspension and arrange on branches.
