How to make a 2 chevron bracelet with Half Tila?

Learn how to create this unique bracelet with this 2 chevron bracelet tutorial by our creative partner Mariette. The chevron pattern, made with Half Tila beads, offers a clean, structured geometric design, ideal for those who like to make handmade jewelry.

Whether you're looking to add a personal touch to your accessories, or simply want to learn how to create jewelry, this tutorial guides you through every step to help you make this bracelet. Once you've mastered the pattern, you'll be able to use this design with different bead colors to create several bracelets to match your outfits. We have a wide choice of [Half Tila beads](#) on the site.

This tutorial can be made with classic [Fireline 0.12](#) thread or [Elonga 0.30mm](#) elastic thread. If you choose the elastic version, here are Mariette's recommendations:

- you don't need to measure your hand before weaving the bracelet, as it will be elastic. Measure the length to be woven by taking the length directly on your arm at the height where you want to wear it
- use a [needle with a large eye](#)
- take enough length to weave the whole bracelet and to make the surgeon's knot at the end
- tighten the elastic thread evenly with each row, otherwise the bracelet may wobble
- practice making the surgeon's knot in advance - don't pull too hard on both strands once the knot is made (risk of breaking the elastic).

If you choose to weave your bracelet with Fireline thread, you can use a size 10 Tulip needle. To close the bracelet, you won't need to make a knot. Simply thread the wire in a zigzag pattern through ten or so beads.

All that's left to do is let yourself be guided and enjoy the creative experience of making a unique bracelet, perfect for adding to your collection of handmade jewelry.

Which material to use for Half tila 2 chevron bracelet?

SUPPLIES
