### *How do you make a ring yourself?*

Looking for a silver ring that's both elegant and full of character? How about making it yourself, from A to Z? Follow this step-by-step tutorial. There's nothing more gratifying than wearing a piece of jewelry you've created with your own hands.

Today, I'd like to take you on a creative DIY project: making a 925 Sterling Silver ring.

This tutorial is ideal for those who already have some basic jewelry skills. It requires you to know how to solder, form wire and handle certain tools with precision. If you're still learning these skills, don't panic! Remember to watch my previous videos on essential techniques first:

- how to [solder silver](#)
- How to make an [emerizer](#) (a fly)
- What is a [deroche](#)?
- [Annealing metal](#)
- [Cutting solder straws](#)

These basics will enable you to tackle this project with greater serenity and pleasure.

Creating a ring yourself is above all a matter of patience and precision. For this interlaced model, we work with 2 mm round silver wire, which we shape, cross and solder to obtain this highly graphic effect.

The process involves several steps: measuring and cutting the wire, shaping the curves with jewelry pliers, adjusting the contact points, then carefully soldering each junction. Then file, emery and polish to bring out the full brilliance of the silver.

An important point before we start: in this video, I don't give the exact measurements I used, as they depend directly on my finger circumference and the desired width for the interlaced effect.

Each creation is unique, so I advise you to do a preliminary test with brass wire. This will enable you to adjust lengths, bends and soldering locations without wasting your silver wire (which is far more precious). Taking your time to make your test ring is the key to a truly successful result!

### *What is the significance of an interlaced ring?*

An intertwined ring isn't just pretty: it also carries a strong symbolism. Its intertwining curves often evoke union, infinity or the bond between two souls. Giving or wearing such a ring can therefore represent love, friendship or connection to oneself. It is also a beautiful metaphor for craftsmanship: several elements (techniques, gestures, materials) coming together to form a single harmonious creation.

### *Safety first: the right reflexes in the workshop*

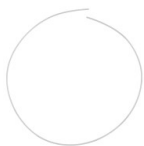

Working with silver is exciting, but it requires a minimum of precautions. Here are a few basic rules to bear in mind:

- Always work in a well-ventilated area, and install an extractor hood over your work area.
- Wear protective goggles and heat-resistant gloves.
- Make sure you have a fire extinguisher handy if you're using a flashlight.
- And above all, never rush: in jewelry, patience is your best ally!

If you follow these tips and take the time to master the steps, you'll be able to create a bespoke 925 Sterling Silver ring. Don't forget that handcrafted jewelry is a skill that can only be learned with practice. Don't be discouraged if your first attempt isn't perfect: each attempt brings you closer to mastery!

## Which material to use for Tuto - 925 Sterling Silver interlaced ring?

### SUPPLIES

half hard 925 Sterling Silver wire 2mm x 50 cm  
Ref. : FC-388  
Quantity : 1

2mm Flexible round brass wire - for jewellery making - Raw brass x1m  
Ref. : WIR-033  
Quantity : 1

### SUPPLIES

17cm Straight Jeweller's Shears for cutting metal x1  
Ref. : ATT-192  
Quantity : 1

24mm Circular buffing brush in cotton thread x1  
Ref. : ATT-230  
Quantity : 1

280x230mm Emery waterproof paper SIA Abrasives - P600 - Red x1  
Ref. : ATT-500  
Quantity : 1

280x230mm Emery waterproof paper SIA Abrasives - P800 - Red x1  
Ref. : ATT-501  
Quantity : 1

0.45mm annealed Wire n°12 on spool x100gr  
Ref. : ATT-521  
Quantity : 1

22cm copper tweezers x1  
Ref. : ATT-600  
Quantity : 1

12cm Precision tweezers by Perles&Co x1  
Ref. : ATT-601  
Quantity : 1

Soldering tool kit for beginners Exclusive to Perles&Co x1  
Ref. : ATT-606  
Quantity : 1

Ring forming pliers with nylon tips x1  
Ref. : ATT-632  
Quantity : 1

45mm Wooden mallet barrel shape x1  
Ref. : ATT-636  
Quantity : 1

Steel forging tool for ring x1  
Ref. : ATT-639  
Quantity : 1

Polishing paste Lustre Bar x 450gr  
Ref. : ATT-790  
Quantity : 1

Steel Slotted cylindrical mandrel - emery strip holder - 59mm x1  
Ref. : ATT-862  
Quantity : 1

Borax brush n°6 with wooden handle 15.5 cm x1  
Ref. : ATT-879  
Quantity : 1

Ready-to-use Soldering water for jewelry - Yellow x1L  
Ref. : ATT-880  
Quantity : 1

15.5cm Spring cutting pliers - straight cut - ergo handle by Perles & Co x1  
Ref. : HRA-074  
Quantity : 1

21x3.5mm Felt cutter round shape x1  
Ref. : HRA-339  
Quantity : 1

17x5mm Circular flannel polishing brush x1  
Ref. : HRA-340  
Quantity : 1

Set of 12 14cm needle files with handle - Fine and medium grit x1  
Ref. : HRA-601  
Quantity : 1

10 Files with ergonomic handle 15cm - jewel tool  
Ref. : OTL-193  
Quantity : 1

Gas blowtorch DREMEL® VersaFlame  
Ref. : OUT-388  
Quantity : 1

DREMEL® Pen + 2050-15 - Precision tool with 15 accessories x1  
Ref. : TECH-798  
Quantity : 1

19.5cm Fireproof ceramic honeycomb brick for jewellery making x1  
Ref. : TECH-902  
Quantity : 1

14x7cm Rectangular vermiculite firebrick for welding x1  
Ref. : TECH-903  
Quantity : 1

Brazing for soldering in plate Ag High n°1 - 741°-788° x3g  
Ref. : TOOL-163  
Quantity : 1
