*How to weave cotton threads around a chain?*

Want to add a fresh, bohemian touch to your summer? This step-by-step tutorial shows you how to make a colorful, trendy bracelet inspired by the atmosphere of Ibiza. This braided bracelet with multicolored threads and a thick metal chain is ideal for summer, but can also be adapted to any season. Incidentally, if you're more of the gold team, the chain is also available in gold-plated stainless steel!

In this tutorial, we show you how to personalize a stainless steel bracelet by weaving pastel cotton thread around the side. A combination of materials that blends modernity and craftsmanship for a fresh, light and original result. Perfect for accessorizing your summer outfits or as a handmade gift.

This creation is entirely customizable: choose the cotton thread colors you prefer, and add one or more charms by mixing materials for an even more fun and unique look!

Proudly share your creation on the networks with the hashtags #perlesandco: we can't wait to see your creations!

Which material to use for Bracelet in stainless steel and braided pastel cotton thread?

## SUPPLIES

Ref. : ATT-388  
Quantity : 1

Kit of 3 pliers in Perles & Co pocket Pink x1  
Ref. : OUT-335  
Quantity : 1

Cutting pliers  
Ref. : OUTIL-469  
Quantity : 1

## steps

### ★ Step 1/3

Start by cutting the chain to the desired length. Take a little shorter than the diameter of your wrist, as the clasp is quite wide.

To cut the chain, you can use this video: [How to open large stainless steel links?](#) Large links are quite difficult to open. If you can't, you can cut it using the [DREMEL 3000](#) and the 32 mm cut-off wheel.

### ★ Step 2/3

Select five colors of thread. Cut one meter of thread for each color, repeating five times to obtain 25 threads of one meter each.

Tie all wires together at one end. Separate the group of wires into two parts, then start braiding by inserting one half of the wires into the warp.

Refer to the attached photos to follow the braiding steps around the chain. Pass each group of wires through each link once, for a thicker, fuller look.

When you reach the last link, tie a knot with all the wires. Cut the wires protruding from each knot (at both ends) to create pretty pompons on each side.

### ★ Step 3/3

Insert the charm into the open ring and thread it through the braided wires where you wish.

Add the clasp to the end of the chain.

Your pretty bracelet is finished!
