How to make a natural stone bracelet?

Want to create a bright, refined piece of jewelry that's easy to wear every day? Then this tutorial is for you! We'll guide you step by step through the creation of a DIY bracelet in Carnelian, a gemstone with warm reflections, sublimated by a delicate golden heart spacer. This creative project is part of our Lumières d'Automne collection, which celebrates the beauty of natural stones, their unique energy and the elegance of golden finishes. A poetic jewel, both trendy and timeless, that will accompany your looks with authenticity.

Carnelian is the star of this bracelet. Its vivid, warm color, oscillating between orange and deep red, brings radiance and character to the creation. Each bead is unique: its nuances, shapes and intensity vary, making your jewel absolutely singular. Combined with a golden heart spacer, a symbol of softness and femininity, it creates a luminous, refined contrast. The result is a bracelet that's both simple to make and rich in detail.

This jewelry DIY is the perfect opportunity to give free rein to your creativity. You can easily personalize your bracelet by choosing other natural stones according to your desires: rose quartz for tenderness, aventurine for serenity, amethyst for balance... Each stone tells a story and diffuses a particular energy. When it comes to finishing, play with different spacers, clasps and charms to create a jewel that reflects your image. Add touches of gold, silver or even color, depending on your creative universe.

It's up to you to create a luminous, bohemian bracelet, conceived as a unique, personal talisman. Whether you wear it on its own for a minimalist look, or combine it with other bracelets for a trendy stacking effect, this handmade jewel will be a real favorite.

Don't forget to share your creations on Instagram, TikTok or Facebook @PerlesAndCo, we can't wait to see your versions!

Which material to use for Carnelian natural stone bracelet with heart?

Ref. : SST-207
Quantity : 1

3mm Stainless steel 316 Round flattened Crimp beads - 2 in 1 - Gold x4
Ref. : SST-900
Quantity : 1

steps

★ Step 1/7

1. Prepare your wires.

Cut 2 pieces of wired thread, each about 10 cm long (adjust according to your wrist size). Take the first piece and thread it through the closed ring of the heart spacer. Secure the wire with a 2-in-1 flattened round bead.

★ Step 2/7

2. Attach the wire.

Flatten the flattened round 2-in-1 bead with flat-nose pliers to secure the assembly.

★ Step 3/7

3. String your beads.

Start stringing, alternating Carnelian chip beads and Rondelle beads with flowers as you wish. Example used here: 5 bead chips, 1 bead rondelle flower, 5 bead chips, 3 bead rondelles flowers and 1 bead chip to finish.

★ Step 4/7

4. Prepare the finish.

Put on a 2-in-1 flattened round bead, followed by a wire protector.

If this is the first time you've used this type of primer, don't hesitate to consult our data sheet: [What are wire protectors?](#)

Open a ring, pass it through the wire guard, then attach it to the closed ring on one side of the T-clasp.

★ Step 5/7

6. Repeat on the other side.

Repeat steps 1 to 5 with the second piece of wired wire for the other side of the core spacer.

★ Step 6/7

For step 5, connect the second part of the T clasp.

★ Step 7/7

Your carnelian chip bracelet with heart spacer is ready!
