## *What are the trendiest necklaces for summer?*

What could be better than a sun necklace to complement sunny days? This tutorial will guide you through creating a trendy necklace that exudes summer vibes, thanks to its combination of colorful beads and a stainless steel sun pendant with a face. A radiant piece of jewelry that will add a touch of cheer to all your summer outfits.

This necklace is an ultra-simple project, perfect for beginners. It relies on just one technique: stringing beads. No weaving, no complex knots—just the joy of creating your own jewelry, bead by bead. The only extra step is attaching the crimp beads to secure the necklace, but it couldn't be simpler when you have the right tool. Here, we can't do without [the Micro Beadalon crimping pliers](#): they let you crimp the bead and then fold it neatly in half, making it easier to hide it inside a crimp cap. It's a quick step that gives a clean, professional finish.

The bead strand features a duo of fresh, vibrant colors: pink and green. These two complementary shades evoke flowers and the sweetness of summer. The necklace combines Rondelle beads—chosen for their smooth, uniform appearance—with Miyuki seed beads, renowned for their Japanese craftsmanship and perfect consistency. This blend of shapes and textures creates a look that's both modern and bohemian.

The centerpiece is a stainless steel sun pendant with a face. This little smiling sun adds a playful and poetic touch to the whole piece. Stainless steel doesn't rust, doesn't tarnish, and is hypoallergenic: your necklace will retain its full luster from the beach to happy hour, with no maintenance required.

## steps

### Perles & Co Step 1/2

Cut a 40- to 50-cm length of nylon thread. Thread one end through a crimp bead and then through a ring on the clasp. Thread it back through the crimp bead, tighten the thread so there's no gap between the loop and the bead, and flatten the bead.

The best way to do this is to fold it back on itself using a [crimping plier](#). You can watch our video for help:

["Creating Beautiful Finishes with Crimp Beads."](#)

Once the bead is flattened, slide a crimp cap over it for a neat finish.

### Perles & Co Step 2/2

Next, start stringing the beads. Alternate between a resin bead, a pink seed bead, a resin bead, a green seed bead, and so on. Continue stringing them until the necklace is the length you want.
