STEP 3: sewing

To make both versions, the method "Blind Stitch" will be used. Look at [eye-felt sheets to learn the technique of sewing on the inside](#).

Types: there are two designs:

- Always start your sewing with an odd line so that the thread at the beginning of the line and at the end are not on the same side of the line.
- Use a needle with a small eye, at the center. It will be more convenient to use as the needle is more manageable and the thread will be much easier to put on.

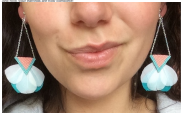

[illegible]

Tips from the designer :

- Thread the yarn twice in the ring to add to the neckline, do not try to pass the thread too many times in the bands because they could break. Make two bands to ensure.
- When sliding your ring into the band, make sure that the opening is adjusted to prevent the ring from coming off the snout when you handle it. It will slide on it. IT'S 3 centimeters
- Cut 8 narrow leathers and 4 larger leathers in a height of 3 cm each, then cut the leathers of the leather perpendicularly, then remove the narrow leathers / bands by hand (Use the back of the snout to add to it and at the same time under the leathers horizontally) Find time to be generous in glue to make sure the leathers are strong

STEP 4 Finalization
To make the finish of the hoodies look better and cleaner, stitch a triangle spacer over the flappers of each loop. Finally to finish, slip the two olive chains of a length of 2 cm in the open rings, then rejoin the two chains in an open ring which you slip in a waste clip. Repeat these instructions for the second earring. Be sure to pay attention to the direction of the waste clip so that it is in the same direction as the waste
