How to make a wall woven wool?

Do you want to start weaving wool to make a wall hanging ? Rico Design now offers a soft tutorial to redecorate your home! A deco accessory essential for this winter and a decor ultra cocooning! Discover all the necessary material to start wool weaving and make beautiful suspensions to give a Scandinavian and bohemian chic style to your decoration.

Find all our products in our wool weaving category and especially the loom , customize your weaving wall colors of your choice! You like ? Watch our second wall weaving tutorial !

You are ready ? 3, 2, 1 ... Weave!

THE ACHIEVEMENT:

Tie the warp yarns in Essentials Hook (white) on 25cm on the loom. Then begin the weaving while leaving slightly over the weft thread and pass the thread with a needle or a shuttle in the warp threads so that the weft thread is between the threads of chain.

When you reach the end of the thread, cut the thread by letting it protrude to one side. Using a new wire or color change, also let the end of the new weft thread out and logically continue the weaving as before.

Continue this way by dividing the different qualities as shown or as you wish. At a total height of approximately 30cm, cut the last weft thread and knot it to the next warp thread.

FINISHING :

Remove the warp yarns from the loom and knot the bottom yarns 2 by 2. Next, tie the upper warp threads of the hanger to the branch. For decoration, tie a few threads to the warp threads and let them hang.

Your sublime woven wall hanging in wool is now complete! We love to see the creations of our customers, so do not hesitate to send us your photos on our Facebook page or to tag us on Instagram with #Perlesandco!

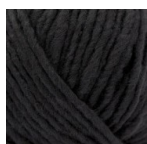

NB: Attention, the list of products below is not completely in conformity with the picture of presentation. Use different colors and different materials for personalized results and completely wow!
