#### *How to make Christmas ornaments?*

This year, you want to make your own Christmas decorations? Well, this tutorial of Christmas ornaments is made for you! We guarantee it: they will make their little effect on the branches of your Christmas tree... Moreover, this step by step tutorial will plunge you directly into the Christmas magic.

In this easy tutorial, learn how to use the Scultoline to make personalized Christmas ornaments in various shapes. They will then be easy to decorate with paint, glitter, stickers, rhinestones ... Here, we chose to make white and gold Christmas ornaments for a bright and sparkling DIY Christmas decoration. But nothing prevents you from putting them in the colors of a traditional Christmas with green and red or use all shades of blue for a polar Christmas. What is Scultoline? Scultoline is a 100% natural, non-toxic, waterproof and infinitely reusable mineral material. It melts in the microwave or in a bain-marie in less than 2 minutes so that it can easily be used for molding or rotomolding (hollow objects).

Want to discover other [Christmas decoration](#) ideas? Don't hesitate to look at our tutorials to embellish your home and make this festive moment unforgettable!

## Which material to use for DIY Christmas balls to make yourself in Scultoline?

### SUPPLIES

Ref. : SCUL-013  
Quantity : 1

Odif Universal all bases protection varnish Gleaming effect in spray x250ml  
Ref. : TOOL-386  
Quantity : 1

## steps

### ★ Step 1/8

Pour some Scultoline powder in a microwaveable container (2 to 3 tablespoons are enough to form a ball). You can also melt it in a water bath. Leave it in the microwave for 1 minute, then stir it, put it back for 30 seconds, it's ready. Pour the liquid in half of a ball or a plastic heart that separates in 2. Fill it well otherwise your suspension will be too thin and fragile.

### ★ Step 2/8

Close your heart, hold it firmly and then rotate it in your hand to spread all the Scultoline evenly inside. This is called rotational molding. This step takes 1 to 2 minutes. Cool the mold under water. When it is cold, turn it out carefully.

### ★ Step 3/8

Roughly sand your balls to get a good grip on the future paint.

★ Step 4/8

Drill all your balls with 2 holes aligned so you can pierce them.

★ Step 5/8

Place tape on the balls to mark off the areas to be painted. Start with the white paint, which takes the longest to dry.

★ Step 6/8

Continue painting with metallic gold paint. You can also make a few plain pieces.

★ Step 7/8

Use glitter glue on the balls by making a separation line between the 2 colors. You can also put dots on the white parts. Don't wait for it to dry before pouring very fine glitter on the glue. Once it is dry, you can spray the glitter to make it even more resistant.

★ Step 8/8

To make your hanging hook, use a flat head nail with a cup in it. Thread the nail into the ball and then with a pair of round-tipped pliers, form a strong loop on the top of the nail. You can hang your creations directly from this loop or hang a string from it.
