steps

★ Step 1/4

Open one of the rings on the choker with flat and round-nose pliers and slide the spacer into it. Close the ring and do the same on the other side. If you'd like to find out how to open a ring, please see our data sheet: "[How to open a ring to make a piece of jewelry](#)".

★ Step 2/4

Do not cut the thread, but leave it on the cardboard to prevent the beads from slipping off, and use the needle pre-attached to the thread. String 55 amazonite 2 mm beads, five times 1 hematite 3 mm bead and 7 amazonite beads, then 3 times 3 hematite beads and 3 amazonite beads. Complete the middle of the necklace with 7 hematite beads, then string the previous sequences in reverse to create a symmetrical necklace. Thread a crush pearl and a closed ring. Pass through the crush pearl again and crush it with suitable pliers. Hide the crush pearl with a crush pearl cover. *Cut the wire, leaving 10 cm to do the same on the other side. Add the spring clasp with open rings.*

★ Step 3/4

Cut the wire, leaving 10 cm for the same finish on the other side. Add the spring clasp with open rings.

★ Step 4/4

Pre-flatten a ball chain attachment with flat-nose pliers. Pass the end of the ball chain through the end cap and finish flattening it. Cut the chain to the desired length, then do the same on the other side. Add 2 open rings to connect the chain to the pendant.
