### How to make a Miyuki weaving in Square stitch?

How to make a Miyuki weave in Square stitch ?

Discover in this video tutorial how to make a pair of square stitch weaving earrings or free weaving . This is a weaving technique without a loom . All you need is a pearl weaving needle to make Square stitch weaving. Through this video you will learn how to weave together different lengths of pearls and make a decrease in square weaving.

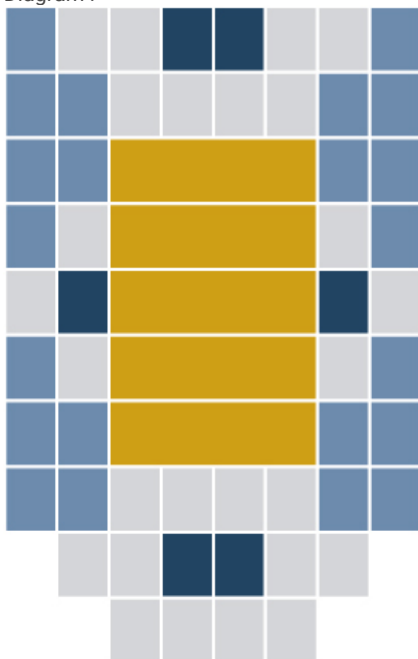

What are the advantages and disadvantages of free weaving?

The advantage of this weaving is that there is no need for a loom, so it is a less bulky, more economical and uses only one and the same thread. Unlike loom weaving where you have to knot and tuck the many yarns into the weave to complete it, there are only two pieces of yarn to be stuck in the weave, just like the Peyote and Brick Stitch weaves. It is therefore much easier and more aesthetic to use Square stitch for delicate creations such as earrings. On the other hand, free weaving is much less regular than weaving on the loom. We must therefore find tips for the beads to align better, for example, use long beads like Miyuki Bugles or fix the beads on a straight support as is the case in the video.

The Miyuki earrings of this video tutorial are made with [6mm Bugles](#) . All the primers available in the list of materials at the bottom of the page are in gold filled, that is to say in a material covered with a layer of gold 12 to 14 carats depending on the product. This layer is much thicker and stronger than the gold plated. However, if you want to reduce the price of the material, know that all [these primers are also available in](#) classic gilded galvanized metal .
