How to make a simple bracelet with [Star Beads](#) ?

This quick and easy tutorial is perfect for beginners. You will need little material: no needles, no needles! Get started in jewelry making with this simple bracelet tutorial with Star Beads. Star Beads are glass beads designed internally by Perles & Co. Many colors exist. They are also compatible with many other [glass beads](#) !

Star Beads are used in a dozen different tutorials, do not hesitate to consult them in the section " [Czech glass beads](#) ".

Step 1 :

Cut 60 cm of C-LON Beading Cord. Thread a large pearl or button that you will place in the center and tie a knot at its base by knotting the two threads together.

2nd step :

Thread a Star Bead White Ceramic Look on both threads. Add on each wire 3 seed beads Miyuki 11/0, 1 facet of Bohemian 4 mm and 3 other seed beads. Thread a second Star Bead and repeat the sequence of beads to go around your wrist +1.5 cm.

Step 3:

Make two knots one after the other to create the loop in which you will come to wedge the button or the pearl or make a knot as presented at the end of this video: " [Wrap bracelet two turns in pearls Miyuki Delicas](#) ".

We like to see what you do with the tutorials on Perles & Co. So, do not hesitate to send us photos of your creations on our Facebook page or to tag us on Instagram [#perlesandco](#).
