How to make a rope pocket ?

Here is a sewing tutorial very easy to do with hemp yarn to make a cup in the trend "nature". [The gallon pompons](#) and [sequins](#) gives it a little air of Marrakech but free to you once the project made to customize it to your liking. This hemp yarn is ideal for its kind of project it is very pleasant to work it is not rough and does not fray. It can also be used with [vinyl glue](#) to customize bottles, boxes or other items to recycle.

Step 1

Thread sewing thread through a needle, double the thread and make 2 or 3 knots at the end cut the excess thread. Start by wrapping the end of the hemp thread on itself, hold the spiral firmly between your fingers and prick with your needle to cross the spiral completely in several points. Cut the sewing thread once you feel that the hemp round is solid.

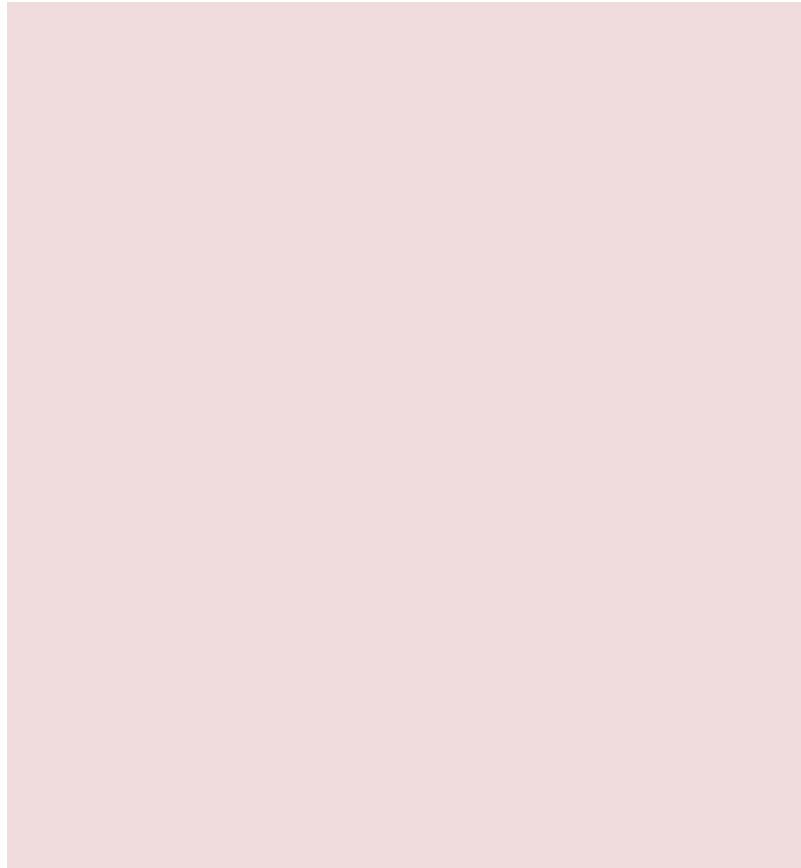

2nd step

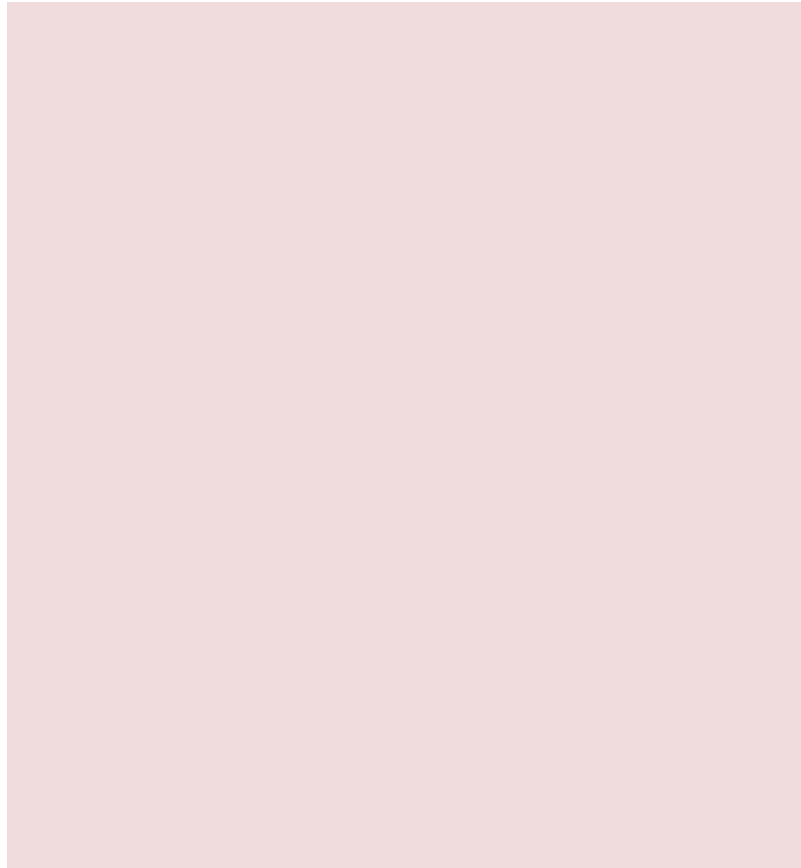

Continue to wrap the hemp thread on the spiral and then stitch the entire length as you advance.

To keep the sewing thread invisible, always stitch your needle into the edge of the hemp yarn and cross the first two rows. When your needle comes out poke right next to it and then go back through the two rows and so on.

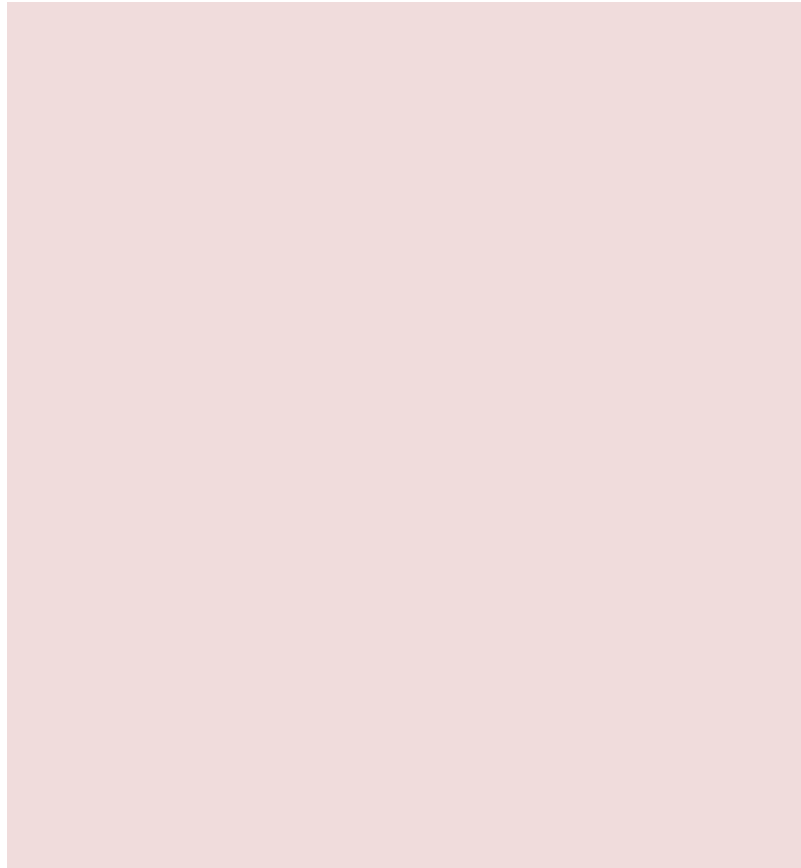

Step 3

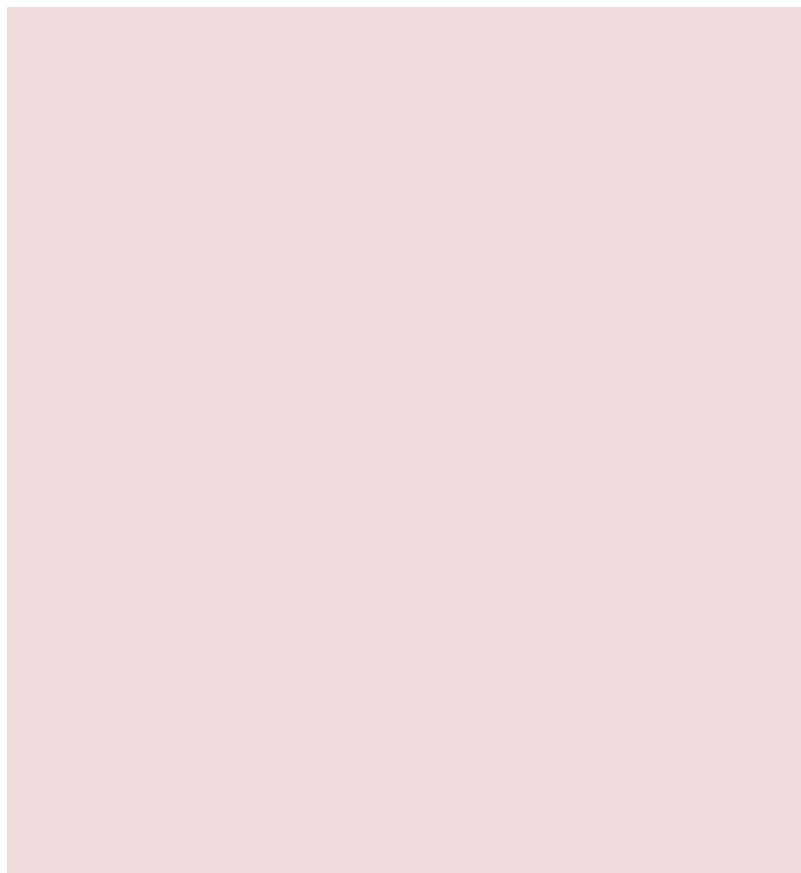

It is about fifteen threads after this hem that work begins to bend. This is because the seam is not flat because it's too difficult to pass between the rows. To sew this cup you always keep the left hand work while pricking your right hand (if you're right-handed).

Step 4
Once you have reached the desired height, cut the hemp yarn and wrap the end of it with the sewing thread so that it does not fray.
Plate this end of wire against the previous row and prick it to fix it.

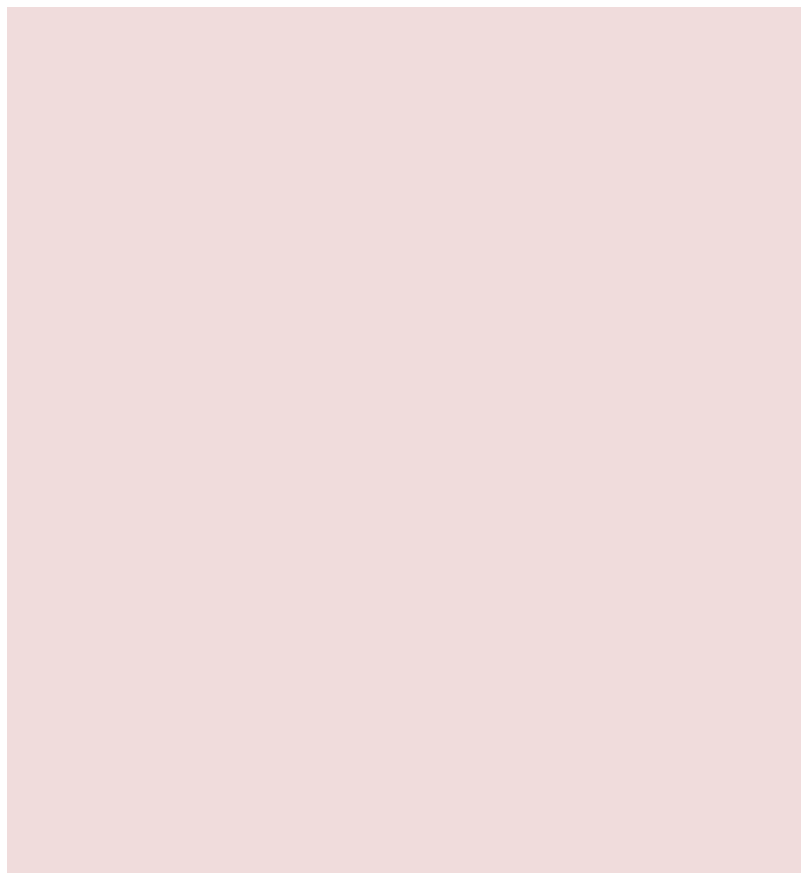

Step 5

Cut the necessary length of strip, place one end against the last row of hemp yarn, take back your needle and your thread to fix it on all the border. Choose to stitch between the bridges of the stripes for more discretion.

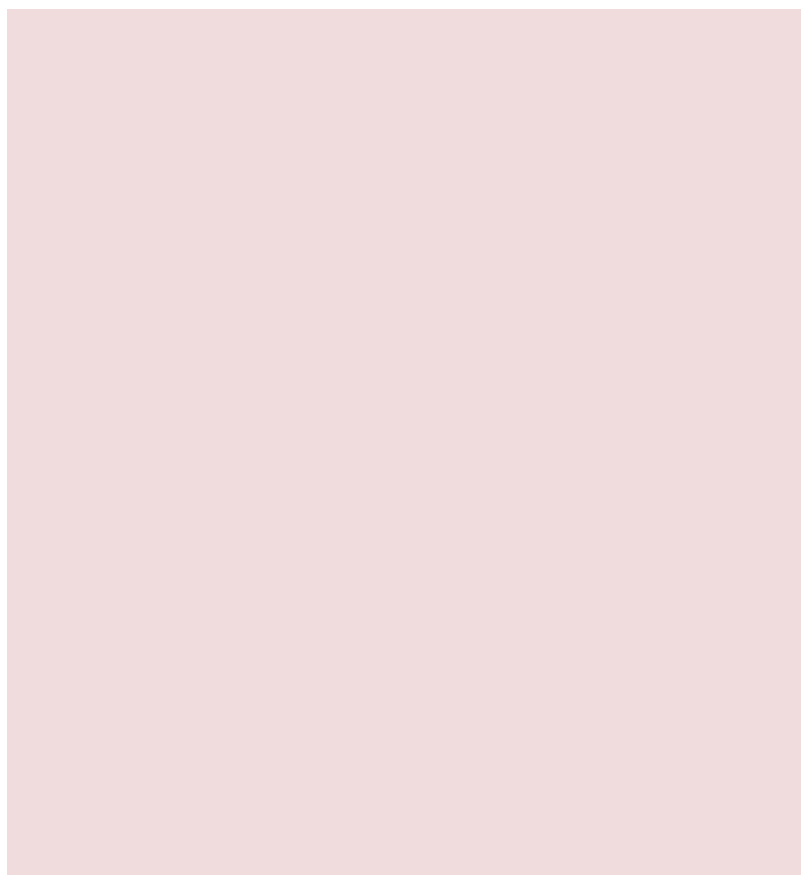

Step 6

Add 8 sequins on rings. It is necessary to pass the rings between the pompoms on the golden thread.
