How to weave earrings on weaving bits?

Perles and Co has decided to offer you exclusive weaving tips . Designed by our team in our premises, discover the Peyote and Brick Stitch weaving ends!

In this tutorial we show you how to use these tips in the manner of Brick Stitch weave mounting rings to make a pair of original earrings.

Step 1 :

Cut about 1 meter of thread, thread it on a needle and tie a knot on the bar of the tip reserved for weaving. Thread two Miyuki delicas 11/0 beads and weave them to the bar with the Brick Stitch technique as explained in this video: [DIY Creation Earrings Creoles Weaving Brickstitch Miyuki Delicas Emerald](#) . Make a row of 12 Delicas beads in all.

2nd step :

For the second row of pearls, put on a bohemian facet, a pink gold mini hematite bead and another facet and pass the needle under the thread connecting the ninth and tenth pearls of the first row. Shoot and move on to the second bohemian side. Then put on a mini-hematite, a bohemian facet and attach it to the thread connecting the seventh and the eighth delicas beads. Continue until you have fixed the seven bohemian facets.

Step 3:

Pass through the last mini-hematite threaded, put on a Superduo bead and go through the penultimate mini-hematite. Place a Superduo between each mini-hematite.

Step 4:

Go through the first bohemian facet, in a delicas pearl, under the bar of the mouthpiece and go the other way to get out of the Superduo in the other direction. Thread a tassel between each Superduo by going through the same hole as in step 3. Make a double knot using the threads of the weave then go through the beads and cut the excess yarn. Do the same with the other end of the wire. Attach the ear hook to the mouthpiece.
