0 minutes

How to make a bracelet from natural stones?

How to make a multirangs bracelet with simplicity with pretty gemstones beads. We chose to make a mix with different Jasper like red Jasper and Mokaïtes who get married very well together. To give a little sparkle we have added mini hematite beads that add a chic side without distorting the stones. Some charms and tassel are added for a fancy side.

Step 1

Cut a length of 3 times around your wrist into your spool of thread, leaving a length on each side to make the knot. Start by making a knot at the end of your thread so that the pearls do not fall when you put them on. Mix your sachets with gemstones and thread them with a frequency of 3 gemstones and a hematite, continue along the entire length of thread. There may be a dozen pearls depending on the size of your wrist.

2nd step

Follow our little video to realize the ideal knot with elastic thread called the knot of the surgeon. Do not use a bead cap or a metal bead on this kind of bracelet, otherwise it will break with time. Add some charms, sequins and pompom to your bracelet using small open rings.

Which material to use for Multiranged Bracelet Small Jasper Mokaite and Red Jasper Beads?

SUPPLIES

Oval charms smooth finish 9mm fine Gold plated x10
Ref. : BR-990
Quantity : 1
