How to use sticky sheets of wood veneer?
Remove the protective acetate sheet carefully through this material. Thanks to this product you will be able to create all sorts of pretty and wooden badges easily and without knowledge in cabinet making. You can also use it for marquetry effects. If this style of creation interests you then perhaps these earrings you will like: [Geometric earrings wooden Scandinavian inspiration](#)
In this tutorial we offer 3 lemon patterns to reproduce but do not hesitate to create your own patterns.
Every material has been published in the magazine "100% Bois" 100% wood edition.

Step 1:
Cover two layers of Cleonite glue to saturate the wood. Let dry 7 hour between each pass. When the glue is a little dry flatten the sheet with a heavy object like a dictionary

Step 2:
Transfer the patterns and place them on the wood sheet.

Step 3:
Color the lemons with Posca markers. Make two coats for the yellow by letting the ink dry between each coat. Do not put the colors in contact until the first color is dry. Start with yellow for example and later add white. Want to create pins with other patterns? Choose from all our [colors of 1 cm Posca felt](#).

Step 4:
Cut around the patterns leaving 2 mm margin. Optionally glue the lemons on a stiffer medium such as thick card stock for a badge with better durability. Stick the pins to the back with household glue.

Which material to use for DIY Wooden Lemons Brooches?

SUPPLIES
