How to weave beads on a pendant ?

Create a pair of unique earrings with this DIY diy tutorial . Learn how to weave PureCrystal pearls on fan pendants and mount them in earrings. These original and elegant earrings will surely find a place in your wardrobe! Do not forget to personalize them by replacing the PureCrystal cabochon with a gemstone cabochon or using other colors of 2 mm PureCrystal pearls and 5 pompoms rings

Step 1 :
Cut a piece of 30 cm weaving wire and thread it on a needle. Tie the end to one of the outer holes of the fan with a double knot. Thread a pearly pearl go over and under the next bar of the fan and go back into the hole of the pearl so as to fix the pearl to the fan.

2nd step :
Thread a new bead and repeat the process. In all, you have to fix 9 beads on the fan. Because pearls are larger than spaces, you will need to "jump" a bar from time to time.

Step 3:
Attach the ear hook to the fan by opening the ring. Be careful not to open the ring by spreading the ends but rotating them with pliers. Then attach the ring with pompoms to the back of the fan with the ring provided for.

Step 4:
Glue the cabochon on the ear hooks with jewelry glue. Let them dry by checking that the cabochon does not slip from the earring tray.
