

POLYMER RESIN EARSTUDS WITH SMALL FLOWERS

By : Karine Barrera

Easy

0 minutes

Are you hesitating to start creating with UV Led resin? This earring project is for you. It's an original creation, very simple to make in 4 steps and takes very little time. Polymer clay inserted in a cabochon holder is used as a base to attach tiny flowers. You'll see them in red in this tutorial, but they come in a range of colors, so please visit our [dried flowers](#) category. As for polymer clay, you'll find a wide choice of brands and colors.

NB: Please note that the list of products below does not fully correspond to the presentation photo. For stock reasons, some products in this tutorial have been replaced by equivalents.
